Subject: **Final - Targeted Brownfields Assessment – Phase I Environmental Site Assessment**
SMDC Mahurin Excavating and Drilling
1606 Gold Avenue
Bozeman, Gallatin County, Montana
U.S. EPA Region 8, START V, Contract No. 68HE0820D0001
Task Order No. 68HE0823F0060
Technical Direction No. 2360-2501-06
Work Assignment Manager: Curtis Jeffries

Dear Mr. Jeffries:

Tetra Tech, Inc. Superfund Technical Assessment and Response Team (START) V is submitting the enclosed Targeted Brownfields Assessment (TBA) Phase I Environmental Site Assessment (ESA) report for the SMDC Mahurin Excavating and Drilling property (subject property) in Bozeman, Gallatin County, Montana. The goal of the TBA Phase I ESA is to identify recognized environmental conditions (REC), historical RECs, and controlled RECs associated with the subject property. This TBA Phase I ESA was completed in accordance with industry standard practice for Phase I ESAs.

If you have any questions or comments regarding this submittal, please contact me at katie.erny@tetratech.com.

Sincerely,

Katie Erny

Katie Erny
START V Project Manager

EXECUTIVE SUMMARY

The U.S. Environmental Protection Agency (EPA) Region 8 Land, Chemicals, and Redevelopment Division tasked Tetra Tech, Inc. (Tetra Tech) Region 8 Superfund Technical Assessment and Response Team (START) V to conduct a Targeted Brownfields Assessment (TBA) Phase I Environmental Site Assessment (ESA) at the Mahurin Excavating and Drilling property at 1606 Gold Avenue in Bozeman, Gallatin County, Montana (subject property). The Snowy Mountain Development Corporation and Bridger Ski Foundation requested assistance under the TBA program from EPA Region 8 to perform a Phase I ESA at the subject property.

The subject property is approximately 0.77-acres and is developed with a two-story metal structure (the Machine Shop) on the north-central portion of the property. The first floor of the Machine Shop consists of an office, bathroom, machine workshop and equipment, tools, one above ground hydraulic lift, metal shaving equipment, generators, and miscellaneous storage containers of petroleum-containing products, drums, and tanks. The second floor of the Machine Shop is used as an apartment with a living room, bathroom, and office. A shed is located directly east of the Machine Shop that stores tools and miscellaneous petroleum products. The subject property consists of a gravel lot to the west, south, and east portion of the Machine Shop and a gravel driveway that has access to Gold Avenue. Bozeman Creek flows north through the east portion of the subject property. The southeast portion of the subject property consists of a tool shed and a white garage that is used to store drilling tools, generators, containers of petroleum products and other miscellaneous equipment. A small wooden house and a small shed are present on the northeastern corner of the subject property. Heavy construction equipment, used tires, above ground storage tanks of various sizes, drums, generators, engines and maintenance tools were observed throughout the subject property. The Machine Shop was built in 1985 and the subject property is currently used as a storage and maintenance facility for Mahurin Excavating and Drilling.

The Bridger Ski Foundation plans to renovate the building and use the subject property as a ski school.

START V conducted this Phase I ESA in accordance with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, ASTM International (ASTM) designation E1527-21, and otherwise in compliance with EPA's All Appropriate Inquiries Rule (AAI Rule) (40 *Code of Federal Regulations* [CFR] Part 312).

The purpose of this Phase I ESA is to identify recognized environmental conditions (REC), historical RECs (HREC), controlled RECs (CREC), business environmental risks (BER), and vapor encroachment

conditions (VEC) associated with the subject property and identify the nature and risks posed by the contamination if present. This executive summary is presented for convenience only. While the executive summary is an integral part of the report, it should not be used in lieu of reading the entire report, including the appendices.

Findings and Opinions

Recognized Environmental Conditions

Review of historical documentation and observations made during the site reconnaissance identified the following RECs and VECs for the subject property:

- The subject property has been occupied by Mahurin Excavating and Drilling since at least 1983. The operations at the subject property have included the maintenance and repairs of machinery, storage of heavy equipment, engines, and numerous containers and tanks containing petroleum and chlorinated solvent products. Based on the condition of the tanks with no secondary containment, unlabeled drums, sheens observed on wet areas, and the occupation of the subject property by Mahurin Excavating and Drilling is considered a REC and VEC.
- An abandoned underground petroleum pipeline that runs from the west to the east is cut off near the back of the white garage and is sealed according to the owner. The potential presence of leaking petroleum pipes is considered a REC and VEC.
- A sump located in a vault that was covered by a stained absorbent pad and three possible floor drains were observed in the subject property building. All drains were covered with metal cuttings and debris. Based on the potential for petroleum products to have been discharged into the drains and have impacted the subject property, the presence of the floor drains is considered a REC.
- The fill material of unknown origin that was used to build up the property for building the Machine Shop is considered a REC.

Business Environmental Risks

Review of historical documentation and observations made during site reconnaissance identified the following BERs for the subject property:

- Old leaking equipment and engines outside and inside of the Machine Shop is considered a BER and will need to be properly disposed of and recycled at a recycling facility.

- The presence of the product in the corroded tanks and drums is considered a BER, and will need to be properly inspected for any remaining liquid or sludges and should be removed. All recovered product and tanks should be transported to a licensed oil recycling facility.
- A 3- to 5-foot-deep manhole was observed in the Machine Shop with a dirt bottom. The manhole is where the water and sewer pipes are located for quick access and kept in a more insulated environment to prevent the pipes from freezing. The utility access in the manhole needs to be brought up to code during building renovations.
- START V observed evidence of water intrusion to the ceiling and walls of the small house located on the northeastern portion of the subject property. The presence of mold is considered a BER.
- Gallatin County, Montana is within EPA Radon Zone 1. The potential presence of radon above 4 picocuries per liter is considered a BER.
- During the site reconnaissance, START V observed peeling white paint on the surface of the one car garage. Based on the subject property building being constructed in 1980s, the potential presence of lead-based paint (LBP) is considered a BER.
- Based on the age of the subject property's building, the potential presence of asbestos containing material is considered a BER.

Recommendations

The Bridger Ski Foundation plans to renovate the building and utilize the subject property as a ski school. Based on the Phase I ESA for the subject property, START V recommends additional investigations to assess the potential hazardous substances or petroleum products.

1.0 INTRODUCTION

The U.S. Environmental Protection Agency (EPA) Region 8 Land, Chemicals, and Redevelopment Division tasked Tetra Tech, Inc. (Tetra Tech) Region 8 Superfund Technical Assessment and Response Team (START) V to conduct a Targeted Brownfields Assessment (TBA) Phase I Environmental Site Assessment (ESA) at the Mahurin Excavating and Drilling property at 1606 Gold Avenue in Bozeman, Gallatin County, Montana (subject property). The SMDC and Bridger Ski Foundation requested assistance under the TBA program from EPA Region 8 to perform a Phase I ESA at the subject property.

The subject property is approximately 0.77-acres and is developed with a two-story metal structure (the Machine Shop) on the north-central portion of the property. The first floor of the Machine Shop consists of an office, bathroom, machine workshop and equipment, tools, one above ground hydraulic lift, metal shaving equipment, generators, and miscellaneous storage containers of petroleum-containing products, drums and tanks. The second floor of the Machine Shop is used as an apartment with a living room, bathroom, and office. A shed is located directly east of the Machine Shop that stores tools and miscellaneous petroleum products. The subject property consists of a gravel lot to the west, south, and east portion of the Machine Shop and a gravel driveway that has access to Gold Avenue. Bozeman Creek flows north through the east portion of the subject property. The southeast portion of the subject property consists of a tool shed and a white garage that is used to store drilling tools, generators, and other miscellaneous equipment. A small wooden house and a small shed are present on the northeastern corner of the subject property. The Machine Shop was built in 1985 and the subject property is currently used as a storage and maintenance facility by Mahurin Excavating and Drilling.

The Bridger Ski Foundation plans to renovate the building and utilize the subject property as a ski school. The machine shop is planned to be renovated, but it has not been decided if the other structures will remain on the property for future use or be demolished for redevelopment.

START V conducted this Phase I ESA in accordance with the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, ASTM International (ASTM) designation E1527-21 (ASTM 2021), and otherwise in compliance with EPA's All Appropriate Inquiries (AAI) Rule (AAI Rule) (Title 40 *Code of Federal Regulations* [40 CFR] Part 312).

1.1 PURPOSE

EPA tasked START V to conduct a Phase I ESA of the subject property to identify recognized environmental conditions (REC), historical RECs (HREC), controlled RECs (CREC), business

environmental risks (BER), and vapor encroachment conditions (VEC), and de minimis conditions to the subject property and identify the nature of contamination and risks posed by the contamination if present.

A REC is (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A *de minimis* condition is not a recognized environmental condition (ASTM 2021 [Section 1.1.1]).

An HREC is a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (ASTM 2021 [Section 3.2.39]).

A CREC is REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (ASTM 2021 [Section 3.2.17]).

START V was also requested to evaluate vapor encroachment according to ASTM E2600-22, which provides practical guidance for conducting a vapor encroachment screen on a property. The goal of conducting a vapor encroachment screening is to identify a VEC, which is the presence or likely presence of chemicals of concern vapors in the subsurface of the subject property (ASTM 2022).

BERs are a non-scope consideration under ASTM E1527-21; that is, they are described and defined by ASTM but not covered under this practice. A BER has a potential environmental risk even though the ASTM definition of a REC, CREC, or HREC is not met (ASTM 2021).

This Phase I ESA is intended to satisfy one of the requirements for the innocent landowner defense, the contiguous property exemption, and the bona fide prospective purchaser exemption to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability; that is, the practices that constitute “all appropriate inquiry into the previous ownership and uses of the subject property consistent with good customary practice,” as defined in 42 *U.S. Code* Section 9601 (35)(B).

1.2 SCOPE OF WORK

EPA developed a scope of work (SOW) for Phase I ESA activities at the subject property. The SOW, based on ASTM designation E1527-21, was to identify RECs, HRECs, CRECs, and BERs for the subject property. EPA also requested that START V identify VECs based on ASTM designation E2600-22. Phase I ESAs are typically conducted in a four-phase process: (1) records review; (2) site reconnaissance; (3) interviews with current and previous owners and occupants of the subject property, adjacent property owners and occupants, and local government agencies; and (4) preparation of a report.

Any items listed in the ASTM standard that this report does not specifically identify as present can be assumed not present within the subject property or within such distance to the subject property as to be of potential concern to the subject property. Any item mentioned but not specifically identified as a REC, HREC, CREC, VEC, or BER can be assumed not to be a REC, HREC, CREC, VEC, or BER.

The following are beyond the scope of this evaluation:

- Sampling and analysis for radon in indoor air, lead in drinking water, and asbestos-containing materials (ACM)
- Screening for lead-based paint (LBP)
- Evaluating indoor and outdoor air quality, regulatory compliance, industrial hygiene, and noise impacts
- Identifying structural, geological, and geotechnical hazards

1.3 LIMITATIONS AND EXCEPTIONS

This report was based partially on information supplied to START V from outside sources and other information available in the public domain. Conclusions and opinions reported herein are based on the information START V obtained in compiling the report. This information is on file at START V's office in Denver, Colorado. START V makes no warranty as to the accuracy of statements made by others that may be conveyed in the report; nor are any other warranties or guarantees, expressed or implied, included or intended by the report except that it has been prepared in accordance with current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services. Because the facts forming the basis for the report are subject to professional interpretation, differing conclusions could be reached. START V does not assume responsibility for discovery and elimination of hazards that could cause accidents, injuries, or damage. Compliance with submitted recommendations or suggestions does not assure elimination of hazards or fulfillment of the client's obligations under local, state, or federal

laws or any modifications or changes to such laws. None of the work performed hereunder shall constitute or be represented as a legal opinion of any kind or nature but shall be a representation of findings of fact from records examined.

1.4 SPECIAL TERMS AND CONDITIONS

There were no special terms or conditions for the Phase I ESA.

1.5 STATEMENT OF USER RELIANCE

START V is not required to verify independently the information provided to it by the user or gathered throughout the course of this Phase I ESA. For this Phase I ESA, EPA Region 8 and the Bridger Ski Foundation may rely on information provided unless knowledge is possessed that certain information is incorrect based on additional information obtained during the Phase I ESA or otherwise known by the person preparing this report.

Section 6 of ASTM E1527-21 outlines the following responsibilities of the user of a Phase I ESA to assist in identification of RECs (ASTM 2021):

- Communication to the EP by the user of information relative to any land title records or title search information reports of which the user is aware (**S**ections 6.1 and 6.2). Relevant information reviewed by START V is in the main body of this report.
- Communication to the EP by the user of information relative to any environmental cleanup liens filed or recorded under federal, tribal, state, or local law of which the user is aware (**S**ections 6.1 and 6.2).
- Communication to the environmental professional (EP) by the user of information relative to any activity and use limitations (AUL)—such as engineering controls, land use restrictions, or deed restrictions—that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law of which the user is aware (Section 6.2). Relevant information provided to START V by the user is in the main body of this report.
- Communication to the EP by the user of any specialized knowledge or experience, or other information that might be material to identification of RECs (Section 6.3). Specialized knowledge or experience communicated to START V is in the main body of this report.
- Communication to the EP by the user if the user believes the purchase price of the property is lower than fair market value because of contamination (Section 6.5).
- Communication to the EP by the user of any commonly known or reasonably ascertainable information within the local community about the subject property that is material to

identification of RECs (Section 6.6). Relevant information provided to START V by the user is in the main body of this report.

- Communication to the EP by the user of the obviousness of the presence or likely presence or threatened releases at the property, of which the user is aware, that might be material to the identification of RECs (Section 6.7). Relevant information provided to START V by the user is contained in the main body of this report.

2.0 SUBJECT PROPERTY DESCRIPTION

This section briefly describes the subject property and the physical setting based on information obtained from EPA Region 8, Mahurin Excavating and Drilling (the current subject property owner), and a records review prior to site reconnaissance. Observations during the site reconnaissance regarding current land use at the subject property and adjoining properties are described in Section 4.0.

2.1 SUBJECT PROPERTY LOCATION AND LEGAL DESCRIPTION

The subject property is at 1606 Gold Avenue in Bozeman, Gallatin County, Montana (Appendix A, Figure 1). The subject property encompasses 0.77 acres and consists of one parcel, Parcel Number 06079906101020000, owned by Joseph D. Mahurin (EDR 2025g). The legal description of the subject property is INDUSTRIAL PROPERTIES SUB, S06, T02 S, R06 E, ACRES 0.765, TRACT 6A, PLAT J-42-A.

The subject property is depicted on the 2020 U.S. Geological Survey (USGS) 7.5-minute series Bozeman, Montana Topographic Quadrangle Map (USGS 2020). The subject property is in the northeast quarter of Section 6, Township 2 South, Range 6 East. The coordinates at the approximate center of the subject property are 45.696 degrees latitude and -111.028 degrees longitude (EDR 2025b).

2.2 SUBJECT PROPERTY AND VICINITY GENERAL CHARACTERISTICS

The 0.77-acre subject property hosts a two-story metal building used for maintenance, storage, and an apartment on the second level. One white garage and three detached sheds are located east and south of the Machine Shop, along with a single-story house on the northeast corner of the subject property. The subject property is within a mixed commercial and residential area and is bounded to the north by commercial property and E Bryant Street, with commercial property beyond; to the east by Bozeman Creek and undeveloped land; to the south by residential property and Bond Street, with commercial property beyond; and to the west by Gold Avenue, with commercial property beyond (Appendix A, Figure 2).

2.3 CURRENT AND PAST USES OF THE SUBJECT PROPERTY

The subject property hosts a two-story metal building occupied by Mahurin Excavating and Drilling for storage and maintenance. The subject property was developed with a structure as early as 1984. Between 1947 and 1983, the subject property was vacant land (EDR 2025f).

2.4 DESCRIPTIONS OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SUBJECT PROPERTY

The subject property is developed with an approximately 2,600 square foot, two-story, metal structure (the Machine Shop) used for maintenance, storage, and an apartment area on the second floor. The Machine Shop is divided into two areas, which consists of a large, high-ceiling area that spans "two-stories" and used for maintenance and storage, and another area which comprises approximately one-third of the Shop, with a downstairs and upstairs portion containing offices, bathrooms, and a living area. To the east of the Shop are three sheds, one white garage and a single-story house. The subject property has a gravel parking area to the west and south of the Shop and has access to Gold Avenue to the west. The subject property has access to municipal utilities, including electricity, gas, water, and sewer.

2.5 CURRENT AND PAST USES OF ADJOINING/SURROUNDING PROPERTIES

The subject property is within a mixed-use residential and commercial area. According to a review of historical documents, the area surrounding the subject property has been used for residential and commercial purposes (EDR 2025a, 2025f, 2025h).

2.6 GEOLOGIC, HYDROGEOLOGIC, HYDROLOGIC, AND TOPOGRAPHIC CONDITIONS

The following subsections describe the environmental setting of the subject property and surrounding area. Appendix B-1 includes copies of the topographic maps that START V examined to assess the physical setting.

2.6.1 Topography

The subject property is included on the USGS 7.5-minute series Bozeman, Montana Topographic Quadrangle Map (USGS 2020). The subject property is approximately 4,743 feet above mean sea level (EDR 2025b). The topographic gradient of the area slopes gently north toward the East Gallatin River (USGS 2020).

2.6.2 Geologic Setting

The subject property is in Gallatin County in southwestern Montana. Geology in the region is generally characterized by Tertiary age volcanic and sedimentary rocks (USGS 1960). Soils on and adjacent to the subject property are Blossberg, Urban land, Enbar, and Water. Table 2-2 summarizes the key soil properties.

TABLE 2-1
SOIL CONDITIONS SUMMARY

Soil Component Name	Corrosion Potential	Saturated Hydraulic Conductivity (µm/sec)	Soil Description
Blossberg (loam)	Moderate	Maximum: 141 Minimum: 42	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Urban Land (loam)	N/A	Maximum: N/A Minimum: N/A	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Enbar (loam)	High	Maximum: 42 Minimum: 14	Class B – Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Water (loam)	N/A	Maximum: N/A Minimum: N/A	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

2.6.3 Hydrogeology

Groundwater in the subject property area generally flows in a northern direction with fluctuation based on the water level in the Bozeman Creek, which runs along the southeast corner of the subject property (USGS 2020). Depth to groundwater on the subject property was not available. The local gradient and groundwater flow direction under the subject property may be influenced naturally by zones of higher or lower permeability, nearby wetlands, or nearby wells. Actual groundwater flow direction can only be determined by collecting site-specific groundwater elevation data.

Potable water is supplied to the subject property by the City of Bozeman, where the water source is provided predominantly by snowpack, with snowmelt in the Gallatin Range feeding Bozeman Creek and Hyalite Creek (Bozeman 2025).

EDR conducted a water well search to locate known private and public water wells within a 1-mile radius of the subject property. EDR identified no state or federal water well permits associated with the subject property. EDR identified eight federal USGS wells and 515 state water well permits within 1 mile of the subject property. EDR identified no oil or gas wells associated with the subject property. EDR identified zero oil or gas wells within a 1-mile radius of the subject property (EDR 2025a).

2.6.4 Hydrology

START V accessed hydrologic data supplied by EDR via the Federal Emergency Management Agency. A regulatory floodway is located at the eastern portion of the subject property and is marked by the Bozeman Creek. A 1 percent annual chance flood hazard and a 0.2 percent annual chance flood hazard are located parallel to the floodway along the eastern portion of the subject property (EDR 2025a).

Surface water runoff on the subject property is to the north-northeast, shown in Figure 2 of Appendix A.

3.0 USER-PROVIDED INFORMATION

The following section summarizes information provided by EPA Region 8 and the Bridger Ski Foundation regarding the ESA. For this Phase I ESA, the *users* are defined as the Bridger Ski Foundation.

3.1 EXISTING STRUCTURE INFORMATION AND DRAWINGS

The subject property hosts a two-story machine shop, along with several outbuildings. The first floor of the machine shop is used for maintenance and storage, while the second level is used as an office and apartment. The outbuildings consist of a vacant home, as well as sheds and a garage used for storage. No existing structure information or drawings were provided.

3.2 SUMMARY OF TITLE INFORMATION

The subject property, Parcel Number 06079906101020000, is owned by Joseph D Mahurin with no deeds dated prior to 1983 (EDR 2025g). Mr. Mahurin purchased the property on October 12, 1983, from the past owners, Chester D. Amberson and Patti Lou Amberson. A copy of the property summary card from County is included in Appendix C.

3.3 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

The users were not aware of any environmental liens or AULs for the subject property. EDR's search did not identify any environmental liens or use limitations for the subject property (EDR 2025g).

3.4 SPECIALIZED KNOWLEDGE

The user was not aware of any previous investigations at the subject property.

3.5 OWNER, SITE MANAGER, AND OCCUPANT INFORMATION

The subject property is owned by Joseph D Mahurin and is currently occupied by Mahurin Excavating and Drilling.

3.6 REASON FOR PERFORMING PHASE I ESA

EPA requested this ESA for the Bridger Ski Foundation to provide an environmental assessment of the subject property. This ESA intends to satisfy one of the requirements for the innocent landowner defense to CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the property consistent with good customary practice," as defined in 42 *U.S. Code* Section 9601 (35)(B).

4.0 SITE RECONNAISSANCE

START V member Ryan Kizer conducted the site reconnaissance on February 26, 2025. Photographic documentation of the site reconnaissance is provided in Appendix D.

4.1 METHODOLOGY AND LIMITING CONDITIONS

The site reconnaissance consisted of a visual inspection of the subject property in accordance with requirements outlined in 40 CFR Part 312. The purpose of the reconnaissance of the subject property was to seek out "conditions indicative of releases or threatened releases," as required by ASTM E1527-21. START V conducted the reconnaissance of the subject property for evidence of the following:

- Use, storage, treatment, disposal, or generation of hazardous substances, controlled substances, or petroleum products;
- Landfills, dumps, or evidence of burial activities or solid waste disposal;
- Aboveground storage tanks (AST), underground storage tanks (UST), drums, or containers capable of storing hazardous substances or petroleum products;
- Transformers or other electrical or mechanical equipment potentially containing polychlorinated biphenyls (PCB);
- Evidence of petroleum-based heating fuel sources;
- Drains, pits, sumps, cisterns, cesspools, or similar receptacles where liquids drain, collect, or are stored;
- Pits, ponds, lagoons, or open pools likely to contain hazardous substances, petroleum products, or waste;
- Staining on pavement or areas of dead, distressed, discolored, or stained vegetation that may indicate RECs;
- Grade or fill material that may indicate contaminated soils or dumping; and
- Chemical smells, petroleum gases, foul odors, wells, and other site-specific environmental conditions.

START V mobilized to the subject property to observe current conditions and obtain additional information relevant to the Phase I ESA. START V also observed exteriors of adjacent and select nearby properties to assess the presence of environmental concerns. The subject property was occupied by Mahurin Excavating and Drilling at the time of site reconnaissance.

Any items listed in the ASTM method not identified in this section can be assumed not to be present. Likewise, any item mentioned but not identified as a REC can be assumed not to pose a REC. General recommendations regarding the subject property are offered in Section 9.0.

4.2 GENERAL SUBJECT PROPERTY SETTING

The following subsections describe the subject property's current and past uses and exterior and interior features.

4.2.1 Subject Property Description

The 0.77-acre subject property hosts a two-story machine shop, along with several outbuildings. The first floor of the machine shop is used for maintenance and storage, while the second level is used as an office and apartment. The outbuildings consist of a vacant home, as well as sheds and a garage used for storage. The subject property is within a mixed commercial and residential area and is bounded to the north by commercial property and E Bryant Street, with commercial property beyond; to the east by Bozeman Creek and undeveloped land; to the south by residential property and Bond Street, with commercial property beyond; and to the west by Gold Avenue, with commercial property beyond (Appendix A, Figure 2).

4.2.2 Exterior Observations

The subject property hosts a two-story metal building (the Machine Shop) in the north central portion of the subject property. One white garage and three detached sheds are located east of the Machine Shop, along with a single-story house on the northeast corner of the subject property. An excavator was parked on the west side of the building and a crane was located southwest of the Machine Shop near Gold Avenue. The owner of the property claimed that approximately 10 to 20 cubic feet of fill material was brought in before the subject building was built. The source of the fill is unknown. The fill material of unknown origin that was used to build up the property for building the Machine Shop is considered a REC.

Several drums of unknown contents were located on the subject property throughout the yard. Three metal 55-gallon drums were unlabeled and contained minimal to no fluids. Two plastic 50-gallon drums were unlabeled and contained unknown contents. Numerous 5-gallon buckets were located throughout the yard and in the sheds and garage, along with containers labeled for hydraulic fluid, kerosene, and motor oil; all buckets and containers were empty or less than half full. Two engines were located in the yard on the east and south side of the subject building and appeared unused. Multiple 50 to 100-gallon above-ground and/or portable diesel storage tanks were observed on the ground, with two being empty and one

containing several gallons. Staining around drums and buckets was not observed but could exist because of snow cover throughout most of the subject property. Dark staining was observed on the floor of the sheds and white garage and at the entrance to the Machine Shop. Sheen was observed where the ground was visible and wet in areas outside of the Machine Shop. The operations at the subject property have included the maintenance and repairs of machinery, storage of heavy equipment, engines, and numerous containers and tanks containing petroleum and chlorinated solvent products. Based on the property use and condition of the tanks with no secondary containment, unlabeled drums, and staining and sheens observed on wet areas around these conditions are considered a REC and a VEC.

The house and white garage, located on the northeast corner and east side of the subject property, respectively, have paint that could potentially be LBP. The paint on both structures was in poor condition. Both structures also have shingle roofs which are also in poor condition. Due to the snow-covered ground, it was hard to determine if paint chips where in the drip line. The potential presence of LBP is considered a BER

Miscellaneous debris (tools, machinery, machine parts, and tires) was observed throughout the yard. No noticeable staining was observed around any of the debris, but possible staining and oil sheen was observed in the driveway on the south side of the Machine Shop. An abandoned underground petroleum pipeline that runs from the west to the east is cut off near the back of the garage and is sealed according to the owner. The potential presence of a leaking petroleum pipeline is considered a REC and a VEC.

The adjacent properties were observed from the subject property during reconnaissance. Commercial properties were observed to the north, west, and south with undeveloped land to the east. No conditions that might create RECs were observed at any of the adjacent properties. Bozeman Creek runs through the property to the east, with the undeveloped land east of the creek. No debris was observed near the creek.

4.2.3 Interior Observations

The site reconnaissance included interior observations of the structures of the subject property. The Machine Shop is an approximately 2,600-square-foot, two-story, metal structure used as a metal fabrication shop and machine maintenance. The shop has two sections: 1) the two-story southwest section includes an office, bathroom/ laundry room, and a living area above; and 2) the single room fabrication and maintenance area that comprises the remainder of the shop. The office, bathroom/laundry room, and upstairs living quarters are separated by drywall. The upstairs portion, including the stairs, have carpet flooring and consist of the living area and a bathroom which contains a toilet and shower. The main shop area consists of garage doors on the west and the southeast side of the building. There are numerous metal fabricating machines, drill presses, torch tables, metal punches, etc. An above ground hydraulic lift is located on the east side of the shop. Metal worktables are located throughout the shop with miscellaneous tools and equipment covering most of them. There are multiple storage shelves and cabinets filled with miscellaneous tools, and equipment. There is visible dark staining on the concrete slab throughout the shop with the majority on the eastern half, in the vicinity of the hydraulic lift and near a drill press. The shelves and cabinets contain retail size containers (less than 1 gallon) of various vehicle fluids, motor oil, cleaning chemicals, hydraulic fluid, and degreasers. A 3- to 5-foot-deep manhole was observed in the Machine Shop with a dirt bottom. The manhole is where the water and sewer pipes are located for quick access and kept in a more insulated environment to prevent the pipes from freezing. A maintenance sink was observed on the main floor of the shop that had dark staining inside of the sink basin. A sump located in a vault that was covered by a stained absorbent pad and three possible floor drains were observed in the subject property building. All drains were covered with metal cuttings and debris. Based on the potential for petroleum products to have been discharged into the drains and have impacted the subject property, the presence of the floor drains is considered a REC.

The interior of the small house on the northeast portion of the subject property is an approximately 300-square-foot, single story, wood structure. It consists of an entryway enclosed with painted sheet wood and drywall on the ceiling. START V observed evidence of water intrusion to the ceiling and walls of the small house. It has an unfinished toilet and shower with bare studs for the walls of the bathroom. The floor is covered in sheet wood and the ceiling is damaged with exposed fiberglass insulation that has fallen to the floor. The main room consists of a kitchen and living area with two bunk beds. The remaining flooring, where sheet wood is not exposed, is covered with vinyl. Miscellaneous items are visible throughout the house. The potential for mold in the small house on the subject property is considered a BER.

4.3 SPECIFIC RECONNAISSANCE ITEMS

The following subsections are related to items observed during the site reconnaissance.

4.3.1 Hazardous Substances and Petroleum Products

Petroleum products were observed in the following areas:

- The Machine Shop:
    - Shelves and cabinets containing retail-size containers (less than 1 gallon) of various vehicle fluids, including hydraulic fluid and motor oil.
- Exterior
    - Approximately three 5-gallon motor oil buckets that were empty.
    - 5-gallon hydraulic fluid bucket that was empty.
    - Approximately three 50 to 100 gallon above-ground diesel storage tanks with two being empty and one containing between 1-2 gallons.
    - Approximately four 55-gallon drums, with three of unknown contents and quantity, and one possibly containing sand and appearing full.

All containers appeared in good condition with no staining observed on the ground but dark staining was observed on the floor of the sheds and garage. Sheen was observed on the ground in areas that were wet.

It is unknown what substance is in the unlabeled 55-gallon drums and if it may be hazardous.

4.3.2 Hazardous Waste

No known hazardous waste was observed at the subject property. It is unknown what substance is in the three full, unlabeled 55-gallon drums and if it may be hazardous.

No other hazardous waste was observed on the subject property during the site reconnaissance.

4.3.3 Landfills, Dumps, Burials, or Solid Waste Disposal

Miscellaneous debris (old tires, empty buckets, and containers) was noted in the yard and the sheds. No other landfills, dumps, burials, or solid waste disposal areas were apparent during the site reconnaissance.

4.3.4 Storage Tanks

Underground Storage Tanks

An abandoned underground petroleum pipeline that runs from the west to the east is cut off near the back of the garage and is sealed according to the owner. No other evidence or information was provided of

current or former USTs was apparent during the site reconnaissance. The potential of a leaking petroleum pipe is considered a REC and a VEC.

Aboveground Storage Tanks

Approximately three 50 to 100-gallon ASTs were observed throughout the subject property on the ground. Based on the unknown age and contents of the tanks and no second containment, this is considered a REC and a VEC.

4.3.5 Polychlorinated Biphenyl-Containing Equipment

PCB content in equipment can only be determined through sampling and laboratory analysis. Pursuant to 40 CFR Section 761.2, oil-filled electrical equipment manufactured prior to July 2, 1979, must be presumed to be "PCB-Contaminated Electrical Equipment" (that is, contains greater or equal to 50 parts per million [ppm] PCBs but is less than 500 ppm PCBs) if the actual PCB contamination has not been established.

No PCB containing materials were observed at the subject property during the site reconnaissance.

4.3.6 Heating, Ventilation, and Air Conditioning System (HVAC) and Fuel Source

Heat is provided by a propane heater. None of the HVAC systems observed are considered to pose a REC.

4.3.7 Drains, Sumps, Pools of Liquids, Standing Water, Cisterns, and Cesspools

Three possible floor drains were observed in the subject property building. All drains were covered with metal cuttings and debris. Installation occurred at the time the slab was poured. The owner said they have a cleanable pump where it discharges. Based on the potential for petroleum products to have been discharged into the drains and have impacted the subject property, the presence of the floor drains is considered a REC.

4.3.8 Pits, Ponds, and Lagoons

No pits, ponds, or lagoons containing hazardous materials were observed during the site reconnaissance.

4.3.9 Stains or Corrosion and Stained Soil or Pavement

Stained concrete was observed on the floors of the shop; the staining seemed well contained and there are no observable cracks in the concrete. In addition, dark staining was observed on the floor of the white garage and tool shed.

No corrosion or stained soil was observed during the site reconnaissance; however, the site was snow covered at the time of our site reconnaissance and was difficult to observe any corrosion or staining of soil on the ground. Although there were discolored puddles and a puddle with an oil sheen near the south garage door. The dark staining observed inside of the Machine Shop, white garage and tool shed and noticeable oil sheens on the ground while wet are considered a REC.

4.3.10 Areas of Dead, Distressed, Discolored, or Stained Vegetation

No areas of dead, distressed, discolored, or stained vegetation that would indicate RECs were observed during the site reconnaissance. However, there was 2-feet of snow covering the ground and no leaves on deciduous trees during the site reconnaissance due to the time of year. START V's field scientist could not see portions of the paved areas of the property to determine if staining is present. It is START V's opinion that the snow-covered ground could impact the conclusions and recommendations in this report.

4.3.11 Possible Fill, Grading, or Solid Waste Disposal

The owner claimed that when the property was purchased they brought in approximately 10 to 20 cubic feet of fill material throughout the property before the building was built. The unknown source of the fill material that was used to build up the property is considered a REC. It is unknown if there was a permit required or applied for to modify the floodplain on the property.

No evidence of solid waste disposal was observed during the site reconnaissance.

4.3.12 Smells of Chemical Gases, Petroleum Products, or Noxious Odors

A mild petroleum odor was observed in the subject property building. These petroleum odors were associated with areas of machine work and maintenance. The petroleum odor contributes to the overall REC for the property for use as a machine shop.

4.3.13 Wastewater and Stormwater Systems and Discharges

Wastewater discharges to the sanitary sewers, west of the subject property. However, surface water flows generally north-northeast, towards and parallel with Bozeman Creek.

4.3.14 Wells and Potable Water Supply

One water well and pump was observed on the subject property on the southside of the Machine Shop. There are no records to the depth of the water well. Also, during the site reconnaissance, the property owner did not confirm if the well is currently being used.

4.3.15 Lead-Based Paint

ASTM E1527-21 does not require a survey or testing for presence of LBP. During the site reconnaissance, START V observed peeling white paint on the surface of the white garage, small house, and Machine Shop. Based on the subject property building being constructed in 1980s, the potential presence of lead-based paint (LBP) is considered a BER.

4.3.16 Asbestos-Containing Building Materials

ASTM E1527-21 does not require testing for presence of ACM. Based on both structures having shingle roofs which are in poor condition and the age of the subject property building, the potential presence of ACM at the Machine Shop, small house and garages on the subject property is possible. The potential presence of ACM is considered a BER.

4.3.17 Other Site-Specific Environmental Conditions

EPA specifies Gallatin County, Montana as within Radon Zone 1, in which indoor radon screening levels could exceed 4 picocuries per liter (EPA 2024). The potential presence of elevated radon levels poses a BER to the subject property.

4.4 VICINITY RECONNAISSANCE

START V observed adjoining properties from public access rights of way to make a cursory assessment of the current land use and its potential for RECs that may have the potential to affect the subject property. Reconnaissance was performed by viewing land use from legal boundaries or by walking upon the adjoining properties that were legally accessible. The subject property is within a commercial area and is bounded to the north, west, and south by commercial properties. To the east is undeveloped land. No environmental concerns were identified on adjoining properties from the view of the properties from public rights of way.

5.0 INTERVIEWS

The objective of conducting interviews is to obtain information concerning RECs in connection with the subject property. This information was obtained verbally and in written form, as indicated below. Interviewees were cooperative and forthcoming with information unless otherwise specified. Interview documentation is provided in Appendix C.

5.1 INTERVIEW WITH OWNER AND USER

START V supplied Caroline Roy and Peter Belschwender of the Bridger Ski Foundation, with an ASTM Phase I ESA User Questionnaire to be filled out with information pertaining to the subject property (Tetra Tech 2025). START V has not received a completed User Questionnaire at this time.

5.2 INTERVIEWS WITH KEY SUBJECT PROPERTY MANAGER AND CURRENT OCCUPANTS

During the site reconnaissance on February 26, 2025, START V interviewed Mr. Joe Mahurin (owner of Mahurin Excavating and Drilling). Mr. Mahurin has been the owner of the building and property for over 30 years. Mr. Mahurin stated that there have not been any significant spills, underground storage tanks, or storage of any hazardous materials (aside from those resulting from basic machine maintenance and metal fabrication).

5.3 INTERVIEWS WITH PAST SUBJECT PROPERTY OWNERS OR OCCUPANTS

Interviews were not conducted with past owners, operators, or occupants. It is START V's opinion that information obtained from previous owners, operators, or occupants likely would not be additional to that obtained from other resources due to the previous use of the subject property being agricultural land use from 1947 to 1965 and vacant land use from 1976 to 1983 (EDR 2025f).

5.4 INTERVIEWS WITH ADJACENT PROPERTY OWNERS OR OCCUPANTS

No interviews with adjacent property owners or occupants were conducted. ASTM E1527-21 does not require interviews with adjacent property owners unless a property has been abandoned and potential unauthorized uses or evidence of uncontrolled access to the abandoned property is evident. The subject property has not been abandoned, and no evidence of unauthorized access was observed; therefore, it is START V's opinion that information obtained from other adjacent property owners or occupants likely would not be additional to that obtained from other resources.

5.5 INTERVIEWS WITH LOCAL OR STATE GOVERNMENT OFFICIALS

START V submitted a FOIA records request to the following agencies via email on February 11, 2025:

- Montana Department of Environmental Quality (DEQ) – Water Quality Records
- DEQ – Air Quality Records
- DEQ – Tanks, Waste, and Recycling
- Montana Department of Natural Resources & Conservation – Board of Oil and Gas Conservation (BOGC)
- Bozeman Fire Department (BFD)
- U.S. Environmental Protection Agency

The DEQ responded on February 25, 2025. Records pertaining to Water Quality, Air Quality, and Tanks, Waste, and Recycling were not provided by the State for the subject property. No other responses were received at the time of this report.

START V conducted a search of the EPA property records database regarding the subject property and surrounding properties. No records were identified (EPA 2025b).

The BFD responded on February 18, 2025. No records of leaks or spills of hazardous materials or any open fire code violations were found.

The BOGC has not provided a response to the records inquiry.

6.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify RECs for the subject property.

6.1 ENVIRONMENTAL RECORDS SOURCES

The following subsections discuss the sources of environmental records that were accessed and reviewed as part of this assessment.

6.1.1 Environmental Database Search

START V reviewed federal, state, regional, and local records to assess whether the subject property or facilities within the approximate minimum search distance have undergone significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects. EDR performed a database search of the subject property in accordance with ASTM E1527-21. A copy of this report is in Appendix E.

The databases searched have been developed and are updated by federal, state, tribal, and local agencies. While these databases are reliable and comprehensive, instances of data being out of date and no longer reflective of actual facility conditions have been reported. The Government Records Searched/Data Currency Tracking section of the EDR report in Appendix E identifies when each database was updated.

The database search identifies properties with environmental records from numerous federal, state, tribal, and local regulatory agencies and distances of these properties from a specified geographic location (typically, the perimeter of the subject property). Descriptions of the environmental databases searched are listed in Appendix E.

Facilities cited in the environmental database are summarized in Table 6-1. The subject property was identified in the EDR database report (EDR 2025a).

EDR also identifies database listings of “unplottable” or “orphan” facilities that, because of poor or inadequate address information, could not be mapped. EDR identified two orphan facilities near the subject property.

TABLE 6-1

SUMMARY OF REGULATORY AGENCY DATABASE REVIEW

Database Searched	Search Distance (miles)	Subject Property Identified	Number of Other Facilities within Search Distance
Federal Records			
FINDS	TP	Yes	1
ECHO	TP	Yes	1

SEMS = Superfund Enterprise management system
SEMS ARCHIVE = SEMS archive
SHWS = State Hazardous Waste Sites
US ENG CONTROLS = United States Engineering Controls
US INST CONTROLS = United States Institutional Controls
UST = Underground storage tank
WQA = Water Quality Act

START V reviewed the facilities listed within the EDR report (EDR 2025a). Database listings are summarized in Table 6-2.

TABLE 6-2

SUMMARY OF REGULATORY AGENCY DATABASE LISTINGS WITHIN THE APPROPRIATE SEARCH RADII UPGRADIENT AND CROSS GRADIENT OF THE SUBJECT PROPERTY

EDR Map No.	Facility Name	Facility Location	Distance and Direction	Apparent Hydraulic Gradient	Facility Type and Remarks	Summary	REC (Basis)
0,11	Idaho Pole Co.	*East Boundary of Bozeman MT on Cedar Road*	0.153-mile south - southeast and east	Upgradient	NPL, SEMS, RCRA-VSQG, US ENG CONTROLS, US INST CONTROLS, LIENS 2, ROD, PRP, FINDS, ECHO, E MANIFEST, INST Control, RPROGRAM	Idaho Pole Co. treats wood products with pentachlorophenol (PCP). The pole yard has been in operation since 1946. The facility ceased wood treatment in September 1997 (EPA 2025a). A Record of Decision (ROD) was issued in September 1992, with Explanations of Significant Differences (ESD) issued in 1996 and 1998. The ROD found the following contaminants of concern (COC): PCP; polycyclic aromatic hydrocarbons (PAH); polychlorinated dibenzo-p-dioxins; and polychlorinated dibenzofurans (dioxins/furans). In August and September 2022, Idaho Pole Company injected amendments into the groundwater source area south of I-90 and two downgradient barriers north of I-90. The two downgradient areas were treated by creating a wall below ground to clean up contaminated groundwater while also letting groundwater flow through it. The site is still currently being monitored by EPA and Montana Department of Environmental Quality (MDEQ), and EPA has found that the remedy now protects human health and the environment. Institutional controls are in place, a deed restriction on Idaho Pole Co property and controls that stop the use of drinking the groundwater.	No (on-site remediation, contamination addressed to the satisfaction of the EPA and MDEQ and institutional controls on site)
1, 2	Mahurin Excavating and Drilling	*1606 Gold Avenue*	TP	Subject Property	FINDS, ECHO, RCRA NONGEN/NLR	The subject property is listed in the EDR database as a FINDS, ECHO, and RCRA NONGEN/NLR. The property is listed as a non-generator. A compliance evaluation inspection occurred in 1993 with no violations reported.	Yes (several RECs identified during site walk)
3	Bailey's Quality Auto Service	*517 Bryant Street*	0.068-mile NW	Cross-gradient	RCRA NONGEN/NLR	Listed as a non-generator as of May 2012, this site was formerly a very small quantity generator (VSQG) in October 1994. The following hazardous wastes have been handled at this facility: ignitable waste (waste code: D001); halogenated solvents used in degreasing (waste code: F001); halogenated solvents (waste code: F002); nonhalogenated solvents (waste code: F003); and nonhalogenated solvents (waste code: F005). No violations were reported.	No (status and hydraulically down gradient)

TABLE 6-2 (Continued)

WITHIN APPROPRIATE SEARCH RADII

EDR Map No.	Facility Name	Facility Location	Distance and Direction	Apparent Hydraulic Gradient	Facility Type and Remarks	Summary	REC (Basis)
4	Bozeman Refinishing	*505 E Bond St STE C*	0.074-mile SW	Cross-gradient	RCRA NONGEN/NLR	Listed as a non-generator with a North American Industry Classification (NAICS) code 81111 and described as an automotive mechanical and electrical repair and maintenance. No violations reported.	No (no violations reported)
5	Ron's Auto Repair Inc	*411 Bond St*	0.091-mile SW	Cross-gradient	RCRA NONGEN/NLR	This site is listed as a non-generator as of 1997. The following hazardous wastes have been handled at this facility: lead (waste code: D008); and halogenated solvents used in degreasing (waste code: F001). No violations have been reported. No information regarding potential environmental hazards found in EPA database (EPA 2025b).	No (Status and hydraulically cross-gradient)
6	MR T's Towing & Repair	*411 Bond St*	0.091-mile SW	Cross-gradient	EDR HIST AUTO	This site is listed as a general automotive repair shop from 1995 to 1997, a gasoline service station from 2004 to 2005, and a towing and repair service from 2006 to 2014. No violations were reported in the EDR database (EDR 2025a). No information regarding potential environmental hazards found in EPA database. No information regarding potential environmental hazards found in EPA database (EPA 2025b).	No (Status and hydraulically cross-gradient)
7, 8	Developmental Technology	*1410 N Rouse*	0.113-mile SW	Cross-gradient	SEMS-ARCHIVE, DEL SHWS, REM RPROGRAM	As of January 28, 2018, this site is an inactive, approximately 0.25-acre electroplating facility that ceased operations in 1976, with no information on the operation's start date. This facility was listed in the CERCLA program in July 1979 and delisted in January 1984 (EDR 2025a). No information regarding potential environmental hazards found in EPA database (EPA 2025b).	No (Status and hydraulically cross-gradient)
9	Wild West Shirt Co.	*1400 Rouse*	0.141-mile SW	Cross-gradient	RCRA NONGEN/NLR	This site was listed as a VSQG in September 1994. Three compliance evaluation inspections were conducted in September 1994, June 1997, and September 2015. No violations reported. As of October 2021, this site is listed as a non-generator. (EDR 2025a).	No (Status)

TABLE 6-2 (Continued)

SUMMARY OF REGULATORY AGENCY DATABASE LISTINGS
WITHIN APPROPRIATE SEARCH RADII

EDR Map No.	Facility Name	Facility Location	Distance and Direction	Apparent Hydraulic Gradient	Facility Type and Remarks	Summary	REC (Basis)
10	Barnard Construction Co. Inc.	*701 Gold Avenue*	0.151-mile SE	Upgradient	RCRA NONGEN/NLR	This site is listed as handling the following hazardous waste: ignitable waste (waste code: D001). As of January 2001, this facility is listed as a non-generator. There were four reported violations in May 2001, which includes two violations for "generators – records/reporting" and two violations for "non-financial record review". No information regarding potential environmental hazards found in EPA database (EPA 2025b).	No (Status).
12	Delta Airlines Inc. Bozeman	*N/A*	0.219-mile East	Cross-gradient	PFAS ECHO	This site is listed in the Enforcement and Compliance History Online (ECHO) and carries an inactive status. No violations identified.	No. (Hydraulically cross-gradient)
13	Mercer Post Plant	*2001 N Rouse*	0.372-mile NW	Downgradient	SHWS, DEL SHWS, REM RPROGRAM	This site is an inactive, approximately 1-acre wood treating facility which operated from at least 1971 to 1974 and consisted of a small, one-vat operation which used pentachlorophenol. Listed in the CERCLA program in May 1986 and delisted in November 1987. No violations reported.	No (distance and hydraulically down gradient)
14,15	Harrington Pepsi Cola Bozeman	*105 Bridger Center Dr.*	0.446-mile NNW	Downgradient	UST FINDER, UST FINDER RELEASE, LUST, UST	This facility listed one closed underground storage tank (UST) (1500-gallon gasoline tank) that was removed in March 1997. One confirmed release was reported in March 1997. The release was given a No Further Action (NFA) status.	No (distance and hydraulically down gradient)
16,17	Treasure State Oil Inc. #5141	*622 E Tamarack St.*	0.470-mile South	Upgradient	UST FINDER RELEASE, LUST, UST	This facility contains 11 inactive USTs, with 0 closed. A release was reported in July 2016 and resolved in November 2016. The release was given a NFA in July 2017. No information regarding potential environmental hazards found in EPA database (EPA 2025b).	No (Status and distance)

WITHIN APPROPRIATE SEARCH RADII

EDR Map No.	Facility Name	Facility Location	Distance and Direction	Apparent Hydraulic Gradient	Facility Type and Remarks	Summary	REC (Basis)
18	Lattice Materials Corp	*516 Tamarack*	0.474-mile South	Upgradient	RCRA-VSQG, DEL SHWS, REM RPROGRAM	This site is an inactive, less than 1-acre Montana Power Company (MPC) substation and operations and storage yard which operated from 1958 to 1978. A Phase II ESA was conducted from September 1994 to October 1994. Seven cubic yards of soil was found to be impacted by petroleum. The site was listed in the CERCLA program in September 1990 and delisted in February 1997. No information regarding potential environmental hazards found in EPA database (EPA 2025b).	No (distance and status)

19-21	MDOT Bozeman #345	*907 N Rouse Avenue*	0.486-mile SSW	Upgradient	UST FINDER, UST FINDER RELEASE, LUST, UST, DEL SHWS, REM RPROGRAM, WQA	This facility has seven closed USTs (6,000-gallon gasoline, two 300-gallon waste oil, 10,000-gallon diesel, 10,000-gallon gasoline, 10,000-gallon gasoline, and a 6,000-gallon diesel). Four releases were reported and are listed as follows: July 1990; March 1992; August 1994; and April 2015. All releases were resolved. The facility was in the Water Quality Act (WQA) program from December 1997 to May 1999, as part of the State Superfund Unit (SSU). In 1998, a site evaluation was conducted to evaluate the extent of diesel impacted soil and groundwater resulting from the release of diesel fuel and road oil at the facility. The release was discovered during the removal of a concrete vault that contained road oil. During the removal of the concrete vault, debris, solidified petroleum (road oil), and approximately 225 cubic yards of impacted soil were excavated and collected for sampling. Results from the sample analyses indicated non-detect levels of benzene, ethylbenzene, toluene, and xylene (BETX) and toxicity characteristic leaching procedure (TCLP) metals. In addition, three confirmation soil samples were collected and analyzed for total petroleum hydrocarbons (TPH). The results from the confirmation soil samples indicated that one sample contained 41,900 parts per million (ppm) TPH, which exceeded the Montana Department of Environmental Quality (DEQ) regulatory action level of 100 ppm TPH. From May through June 1998, the remaining impacted soils (approximately 75 tons) were transported and disposed of at the Lewis and Clark County Landfill; three soil borings were converted to monitoring wells after the soil samples were collected; and the monitoring wells were also sampled and analyzed for diesel range organics (DRO). The analytical results from the soil samples reported DRO levels ranging from non-detect at 11 feet below ground surface (bgs) to 31 milligrams per kilogram (mg/kg) at 7 feet bgs. Also, DRO as diesel in the soil samples were found to be non-detect in all three borings, and total extractable hydrocarbons (TEH)	No (status)

TABLE 6-2 (Continued)

SUMMARY OF REGULATORY AGENCY DATABASE LISTINGS
WITHIN APPROPRIATE SEARCH RADII

EDR Map No.	Facility Name	Facility Location	Distance and Direction	Apparent Hydraulic Gradient	Facility Type and Remarks	Summary	REC (Basis)
						concentrations ranged from 24 mg/kg at 11 feet bgs to 69 mg/kg at 7 feet bgs. Groundwater analyses for DRO indicated all three samples to be at non-detect levels for DRO, DRO as diesel, and TEH (EDR 2025a). No information regarding potential environmental hazards found in EPA database (EPA 2025b).	
22	Bridger Drive	*705/707/709 Bridger Dr. Bozeman MT.*	0.493-mile North	Downgradient	DEL SHWS, REM RPROGRAM, WQA	This site is listed as an automotive repair facility in EDR and part of the WQA program from September 1991 to August 1992 due to historic hydrocarbon contamination.	No (hydraulically downgradient)
23	Montana Rail Link Asbestos	*North of 506 Front Street*	0.675-mile SE	Upgradient	DEL SHWS, REM RPROGRAM	This site is a former 1-acre asbestos ore loading area which operated from the 1930s to the 1950s. Twelve-hundred cubic yards of asbestos impacted soil was observed and cleaned up in 1991. The site was listed in the CECRA program from January 1989 to December 1996.	No (distance and nature of contamination)
24	Bozeman Old City Landfill	*N of Griffin Drive East of Glen Lake*	0.713-mile NW	Downgradient	SHWS, DEL SHWS, REM RPROGRAM, WQA	The site is an inactive, approximately 30-acre municipal landfill which operated from 1962 to 1970. The city now leases the site to Montana Department of Fish, Wildlife & Parks as part of the East Gallatin Recreation Area. A 1983 CERCLA preliminary assessment by MDHES summarized the contamination potential from the landfill leachate and indicated a site investigation was warranted. Upon investigation, no contamination was detected in groundwater, and no significant exceedances of background values were found in soils. Based on investigation and health risk assessment results, the Environmental Protection Agency (EPA) declared the facility "No Further Action" under CERCLA (EDR 2025a).	No (downgradient, distance, and status)

TPH = Total petroleum hydrocarbons
PCP = Pentachlorophenol
RCRA = Resource Conservation and Recovery Act
US ENG CONTROLS = US Engineering Controls
US INST CONTROLS = US Institutional Controls
USGS = United States Geological Survey
UST = Underground Storage Tank
VSQG = Very Small Quantity Generator
WQA = Water Quality Act

EDR identified one database listings of orphan facilities that could not be mapped because of poor or inadequate address information: The City of Bozeman Landfill Conditional and City of Bozeman Transfer Station are listed on the Solid Waste Facility/Landfill database. Limited information was provided on the orphan sites by EDR. General research shows that all the sites are outside of the ASTM-recommended search distance.

6.1.2 Vapor Encroachment Screening

START V completed an initial vapor encroachment screening to evaluate whether a VEC exists in the subsurface below any proposed subject property structures from hazardous substances, petroleum, and petroleum products, including volatile organic compounds (VOC), semivolatile organic compounds (SVOC), and inorganic volatile compounds. The Tier 1 non-invasive vapor encroachment screening assessed the presence of chemicals of concern within the area of concern. The approximate minimum search distance used to establish the area of concern is based upon the type of chemical of concern (petroleum hydrocarbons versus nonpetroleum hydrocarbon) and location of the source relative to the subject property. These search distances are specified in ASTM E2600-22 "*Standard Guide for Vapor Encroachment Screening on Sites Involved in Real Estate Transactions"* (ASTM 2022), which identifies standard environmental record sources to be reviewed to identify known or suspect sources of contamination within the area of concern. The approximate minimum search distances for establishing the area of concern based on the 2022 standard are shown in Table 6-3.

TABLE 6-3

VAPOR ENCROACHMENT SCREENING APPROXIMATE MINIMUM SEARCH DISTANCES

Area of Concern		
Standard Environmental Record Sources (where available)	**Approximate Minimum Search Distances Surrounding the Subject Property (miles)**	
	Chemicals of Concern	**Petroleum Hydrocarbon Chemicals of Concern**
Federal NPL	0.33	0.10
Federal CERCLIS	0.33	0.10
Federal RCRA CORRACTS	0.33	0.10
Federal RCRA non-CORRACTS TSD	0.33	0.10
Federal RCRA Generators	Subject Property Only	Subject Property Only
Federal Institutional Control/Engineering Control	Subject Property Only	Subject Property Only
Federal ERNS	Subject Property Only	Subject Property Only
State and Tribal-equivalent NPL	0.33	0.10
State and Tribal-equivalent CERCLIS	0.33	0.10
State and Tribal Landfill or Solid Waste Disposal Sites	0.33	0.10
State and Tribal LUST	0.33	0.10
State and Tribal UST	Subject Property Only	Subject Property Only
State and Tribal Institutional Control/Engineering Control	Subject Property Only	Subject Property Only
State and Tribal Voluntary Cleanup	0.33	0.10
State and Tribal Brownfield	0.33	0.10

Notes:
CERCLIS = Comprehensive Environmental Response, Compensation, and Liability Information System
CORRACTS = RCRA Corrective Action Activity
ERNS = Emergency Response Notification System
LUST = Leaking Underground Storage Tank
NPL = National Priorities List
RCRA = Resource Conservation and Recovery Act
TSD = RCRA Treatment, Storage, and Disposal
UST = Underground Storage Tank

For a VEC to be present, a pathway for vapor encroachment to the subject property must exist. As a result, VECs are identified primarily when contamination is known to be present on the subject property or properties immediately adjacent. If a VEC cannot be ruled out based on distance, lack of records, or locations of tanks, confirmation of the presence or absence of that VEC can occur only through sampling. Based on the results of the initial vapor encroachment screening, one facility was identified within the approximately minimum search distances which is further discussed in Section 6.1.1: Idaho Pole Co. The Subject Property was also identified on the Resource Conservation and Recovery Act (RCRA) Non-Generator list, but the EDR database does not indicate that the Subject Property does or has generated hazardous wastes.

The operations at the subject property as a maintenance and repair shop of machinery and storage of heavy equipment and petroleum products since at least 1983 is considered a REC. During the site reconnaissance, the presence of five 55-gallon drums with unknown contents, three unlabeled and rusty

above ground diesel storage tanks, multiple 5-gallon buckets and numerous containers containing petroleum-based liquids were observed during the site reconnaissance. Stains on the floors were observed, sheen was present on the ground while wet and no secondary containment or protection were present. The improperly stored containers may have released contaminants into the subsurface over time and are now resulting as a VEC.

6.1.3 Environmental Liens and Activity and Use Limitations

An environmental lien and AUL search was conducted for the subject property. No information on valuation reduction was provided to START V. EDR's search identified no environmental liens or AULs regarding the subject property (EDR 2025g).

6.1.4 Engineering and Institutional Controls

As part of the environmental records search by EDR, federal and state databases for institutional and engineering controls were searched, including EPA's Engineering Controls Sites List and Sites with Institutional Controls and the U.S. Department of the Navy's Land Use Control Information System. No engineering or institutional controls were identified for the subject property (EDR 2025a).

6.1.5 Chain of Title

The subject property parcel is currently owned by Joseph D. Mahurin with no deeds dated prior to 1983 (EDR 2025g) (Appendix C).

6.2 HISTORICAL USE INFORMATION REGARDING THE SUBJECT PROPERTY AND ADJOINING PROPERTIES

START V gathered historical data regarding the subject property and surrounding area to identify past uses and evaluate detectable environmental issues that may pose RECs to the subject property. The following subsections describe land title records, property tax files, building records, Sanborn maps, aerial photographs, topographic maps, city directories, and past environmental reports available regarding the subject property.

6.2.1 Chain of Title

The subject property is identified in EDR as Parcel Number 06079906101020000. The parcel is owned by Joseph D. Mahurin with no deeds dated prior to 1983 (EDR 2025g) (Appendix C).

6.2.2 Tax Map Report

Property tax files can include records of past ownership, appraisals, maps, sketches, photos, or other information pertaining to the subject property. EDR (2025d) conducted a search of available property tax files and did not locate any for the subject property. Appendix B-2 includes a copy of EDR's property tax file search report.

6.2.3 Building Permit Report

Building department records at local governments can indicate permission to construct, alter, or demolish improvements at a subject property. EDR (2025e) conducted a search of available building department records. The building department records indicate a building permit for a residential re-roofing project in 2014. The records did not identify any additional building permits for the subject property. Appendix B-3 includes a copy of EDR's building department records search report.

6.2.4 Sanborn Map Report

EDR conducted a search for Sanborn fire insurance maps of the subject property and surrounding area. EDR was unable to provide Sanborn fire insurance maps of the subject property and surrounding area (EDR 2025c) (Appendix B-4).

6.2.5 Aerial Photographs

START V reviewed aerial photographs of the subject property and surrounding area (EDR 2025f) (Appendix B-5). Table 6-4 summarizes information obtained from the aerial photographs.

TABLE 6-4

SUMMARY OF AERIAL PHOTOGRAPHS

Year	Comments
1947	**Subject Property:** The subject property appears undeveloped with Bozeman Creek cutting through the east portion of the property. **Surrounding Properties:** The surrounding area appears to be predominantly undeveloped with a mix of agricultural land and sparse buildings. Road and railway development is visible further south and southwest.
1965	**Subject Property:** The subject property appears similar to 1947. **Surrounding Properties:** Surrounding properties appear similar to 1947, with increased residential/commercial development further south and northwest.
1976	**Subject Property:** The subject property appears similar to 1965. **Surrounding Properties:** Surrounding properties appear similar to 1965. Increased residential and commercial development to the north beyond E Griffin Drive. The Interstate appears south of the subject property. Commercial development appears to the west beyond N Rouse Avenue.
1981	**Subject Property:** The subject property remains undeveloped. **Surrounding Properties:** Gold Street appears to the west, Bond Street appears to the southwest, and East Bryant Street appears to the northwest. The adjoining property to the southwest is depicted with the present-day structure. Increased commercial development is depicted to the northwest across N Rouse Avenue.
1984	**Subject Property:** The subject property appears to be cleared with gravel covering the site. **Surrounding Properties:** The north and south adjoining properties are depicted with present-day structures. Additional commercial buildings are depicted to the west, adjacent to N Rouse Avenue.
1995	**Subject Property:** The present-day Machine Shop structure appears on the subject property. **Surrounding Properties:** The north and northwest adjoining properties are depicted with present-day structures. Additional commercial development appears further west, south, and southeast of the subject property.
2006	**Subject Property:** The subject property appears similar to 1995, with the additional shed structures visible on the southeast portion of the site. **Surrounding Properties:** The west adjoining property beyond Gold Avenue is depicted as a storage lot, similar to present-day conditions. Commercial buildings appear to the northwest and northeast of the subject property beyond Bozeman Creek.
2011	**Subject Property:** The subject property appears similar to 2006. **Surrounding Properties:** An additional present-day structure is depicted at the north adjoining property. The adjoining properties are depicted in their present-day configuration.
2015	**Subject Property:** The subject property appears similar to 2011. **Surrounding Properties:** The area surrounding the subject property appears similar to 2011. Additional commercial buildings appear to the southeast of the subject property beyond Bozeman Creek.
2019	**Subject Property:** The subject property appears similar to 2015.

	Surrounding Properties: The area surrounding the subject property appears similar to 2015. An extension of Bond Avenue and a paved parking area are depicted further southeast of the subject property beyond Bozeman Creek.

Based on aerial photographs, the subject property had a structure built between 1984 and 1995. The subject property was undeveloped between at least 1947 and 1984.

Review of aerial photographs did not identify potential source areas or environmental issues; however, aerial photographs can be used in conjunction with other historical records presented in this section to identify previous land use on the subject property.

6.2.6 Historical Topographic Maps

Topographic maps can be used as indicators of land use and structural changes on the subject property and can help identify historical land use that might pose an environmental issue to the subject property. START V reviewed topographic maps of the subject property and surrounding area (EDR 2025b) (Appendix B-1). Table 6-5 summarizes information obtained from the historical topographic maps of the subject property and surrounding area.

TABLE 6-5

SUMMARY OF HISTORICAL TOPOGRAPHIC MAPS

Year	Description
1951, 1953 Bozeman, 15 minute	**Subject Property:** No structures are depicted on the subject property. A creek traverses south-north through the eastern portion of the subject property. **Surrounding Properties:** Sparse buildings surround the subject property, with land mostly undeveloped in the immediate vicinity. The City of Bozeman appears to the southwest of the subject property.
1987 Bozeman, 7.5 minute	**Subject Property:** The subject property is depicted similar to 1951 and 1953. **Surrounding Properties:** Gold Avenue, East Bryant Avenue, and Bond Street are depicted west of the subject property. Buildings appear to the west and northwest of the subject property, including at the southwest adjoining property.
2014 Bozeman, 7.5 minute	**Subject Property:** The subject property is similar to 1987. **Surrounding Properties:** The surrounding area is similar to 1987; however, structures are not depicted on the map. A new road is depicted to the southeast of the subject property beyond Bozeman Creek.
2017 and 2020 Bozeman, 7.5 minute	**Subject Property:** The subject property is similar to 2014. **Surrounding Properties:** Buildings are not depicted on the map. The surrounding area is similar to 2014.

Review of topographic maps did not identify potential source areas or environmental issues; however, topographic maps can be used in conjunction with other historical records presented in this section to identify previous land use on the subject property.

6.2.7 City Directories

START V reviewed city directory listings of the subject and nearby properties (EDR 2025h) (Appendix B-6). Table 6-6 summarizes information found in the city directories for the subject property address 1606 Gold Avenue and the adjacent surrounding properties. No other listings for adjacent properties were found in the city directories.

TABLE 6-6

SUMMARY OF HISTORICAL CITY DIRECTORIES

Property Address	Property Occupant(s)
Subject Property	
1606 Gold Avenue	Mahurin Excavating and Drilling/Welding and Machine (1989-2020)
1606 Gold Avenue	No Listings (1984)
Adjacent and Nearby Properties	
1612 Gold Avenue (North Adjoining)	Retail (2000-2020) Bozeman BioTech Pest Control (1989-1994) No Listings (1984)
1502 Gold Avenue (South Adjoining)	Other Commercial (1989-2020) Beartooth Publishing and Goodtime Publishing (2010) Lichtenberg Land and Cattle Company (2000) White RS Land and Livestock Co Inc (1989-1994) Sky Country Trucking (1989) Residential (1984)
701 Gold Avenue (Southeast Adjoining)	No Listings (2014-2017) Barnard Construction Company (2000-2010 and 2020) No Listings (1964-1994)
516 E Bryant Street (West Adjoining)	Harvest Solar MT LLC and Sauce Headwear LLC (2020) No listing (2010-2017) Residential (2005) Bridger Communications and Comtronics (2000) No Listings (1984-1994)
1515 Bond Street (Southwest Adjoining)	No Listing (1989-2020)
517 E Bryant Street (Nearby Northwest)	Kopper Kreations (2000-2010 and 2020) De Gidio's Sheet Metal (1984-2020) No Listing (2014) Duffs Mobile Welding and Repair (2010) Ice Nitrous Systems Inc (2005) Bailey's Quality Auto Service (1984-2000)
605 E Bryant Street (Nearby North)	Residential (2000-2005, 2020) No Listings/Unknown Occupant (1984-1994, 2010-2017)
507 Bond Street (Nearby Southwest)	Double J Construction LLC (2020) Cass Upholstery Company and Vail Ken CPA (2000) No Listings (1984-1994, 2005-2017)
602 Bond Street (Nearby South)	Other Commercial/Non-Profit (2005-2020) Elite Towing & Repair (2000) Bush Drilling Inc (1994-2000) No Listings (1984-1989)

Review of city directories did not identify potential source areas or environmental issues; however, city directories can be used in conjunction with other historical records presented in this section to identify previous land use on the subject property.

6.2.8 Regulatory Agency Files and Record Review

No environmental records were provided for the subject property.

6.2.9 Additional Environmental Reports

ASTM E1527-21 refers to other historical sources as those that are credible to a reasonable person and that identify past uses or occupancies of the subject property or surrounding area. No previous investigation reports were provided for the subject property.

7.0 FINDINGS AND OPINIONS

Review of historical documentation and observations made during the site reconnaissance identified the following RECs for the subject property:

- The subject property has been occupied by Mahurin Excavating and Drilling since at least 1983. The operations at the subject property have included the maintenance and repairs of machinery, storage of heavy equipment, engines, and numerous containers and tanks containing petroleum and chlorinated solvent products. Based on the property use and condition of the tanks with no secondary containment, unlabeled drums, and staining and sheens observed on wet areas around these conditions are considered a REC and a VEC.
- An abandoned underground petroleum pipeline that runs from the west to the east is cut off near the back of the white garage and is sealed according to the owner. The potential presence of a leaking petroleum pipe is considered a REC and a VEC.
- A sump located in a vault that was covered by a stained absorbent pad and three possible floor drains were observed in the subject property building. All drains were covered with metal cuttings and debris. Based on the potential for petroleum products to have been discharged into the drains and have impacted the subject property, the presence of the floor drains is considered a REC.
- The fill material of unknown origin that was used to build up the property for building the Machine Shop is considered a REC.

Review of historical documentation and observations made during site reconnaissance identified the following BER for the subject property:

- Old leaking equipment and engines outside and inside of the Machine Shop will need to be properly disposed of and recycled at a recycling facility.
- The presence of the product in the corroded tanks and drums will need to be properly inspected for any remaining liquid or sludges and should be removed. All recovered product and tanks should be transported to a licensed oil recycling facility.
- A 3- to 5-foot-deep manhole was observed in the Machine Shop with a dirt bottom. The manhole is where the water and sewer pipes are located for quick access and kept in a more insulated environment to prevent the pipes from freezing. The utility access in the manhole needs to be brought up to code during building renovations.

- START V observed evidence of water intrusion to the ceiling and walls of the small house located on the northeastern portion of the subject property. The presence of mold is considered a BER.
- Gallatin County, Montana is within EPA Radon Zone 1. The potential presence of radon above 4 picocuries per liter is considered a BER.
- During the site reconnaissance, START V observed peeling white paint on the surface of the one car garage. Based on the subject property building being constructed in 1980s, the potential presence of lead-based paint (LBP) is considered a BER.
- Based on the age of the subject property's building, the potential presence of asbestos containing material is considered a BER.

Review of historical documentation and observations made during the site reconnaissance identified the following *de minimis* condition for the subject property:

- The presence of dark staining inside of the maintenance sink is considered a *de minimis*.
- Oil staining on the concrete pad south of the Machine Shop is consistent with vehicle parking and considered *de minimis*.

8.0 EXCEPTIONS, DELETIONS, AND DATA GAPS

START V generally conformed to the scope and limitations of ASTM E1527-21 (ASTM 2021) in conducting this Phase I ESA of the Mahurin Excavating and Drilling in Bozeman, Gallatin County, Montana. Exceptions, deletions or data gaps are as follows:

- No building permits were available for review. START V did not find records in the EDR database or through the Bozeman Fire Department. Record searches were conducted from February 10-18, 2025. It is START V's opinion that even though the lack of building permits represents a significant data gap, it does not impact the ability to render an opinion regarding RECs.
- During the site reconnaissance, the ground was covered by two feet of snow. START V's field scientist could not see portions of the paved areas of the property to determine if staining is present. It is START V's opinion that the snow-covered ground could impact the conclusions and recommendations in this report.
- Freedom of Information Act (FOIA) requests were submitted to various agencies. As of the date of this report, responses have not been received from all agencies. Information obtained from these sources could likely be associated with records of releases, permits or disposal manifest regarding products stored on the subject property. It is START V's opinion that the lack of information from regulatory agencies could impact the conclusions and recommendations in this report.
- Time gaps of more than 5 years dating back to 1940 were noted in available historical information. It is START V's opinion that the presence of time gaps does not impact the ability to render an opinion regarding RECs.

9.0 CONCLUSIONS AND RECOMMENDATIONS

The Bridger Ski Foundation plans to renovate the building and utilize the subject property as a ski school. Based on the Phase I ESA for the subject property, START V recommends additional investigations to assess the potential hazardous substances or petroleum products.

10.0 CERTIFICATION STATEMENT

Resumes of the Environmental Assessor who conducted the site reconnaissance and the EP who prepared the report and oversaw completion of this work are provided in Appendix G. We declare that, to the best of our professional knowledge and belief, we meet the definition of an EP as defined in 40 CFR Part 312.10. We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject property addressed in this report. We have developed and performed all appropriate inquiries in conformance to the standards and practices set forth in 40 CFR Part 312 and attest to the completeness and accuracy of information in this report.

If you have any questions concerning the findings and conclusions conveyed in this report, please email the START V Project Manager Katie Erny at katie.erny@tetratech.com.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Tetra Tech EM, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Scoring:	4

Summary Details:

Conditions at proposal October 15, l984): Idaho Pole Co. treats wood products with pentachlorophenol PCP) on a 10-acre site in Bo eman, Gallatin County, Montana. The pole yard has been in operation since l946. Ground water is very shallowand flows to the north/northwest, where it discharges into Rocky Creek. About 1,250 people use wells within 3 miles of the site as a source of drinking water. Any ha ardous material leaking onto the ground during the wood-treatment process could contaminate ground water due to highly permeable soils and shallow ground water. A greater concern is that waste water discharged onto the surface at the facility could rapidly infiltrate the shallow ground water. The facility has ahistory of surface water problems associated with its discharges. In l978, the State investigated a complaint concerning PCP in Rocky Creek. At that time, a ditch, originating at the Idaho Pole plant and running from the plant for about200 to 300 yards before entering Rocky Creek, contained large quantities of PCP. While minute quantities were noted at the mouth of the ditch and running into Rocky Creek, large quantities had collected on the rocks and vegetation along and inthe ditch. Stains high on the sides of the ditch and on vegetation indicated that discharge had been much greater in the past. Following the investigation, the State issued a compliance order in l984 requiring Idaho Pole to take measures to eliminate discharges into Rocky Creek and to prevent the future placement of wastes in locations where they were likely to pollute State waters. Idaho Pole started work to comply with the State s order. However, because of leaking pipes,leaking tanks, and a deteriorated main pumphouse sump, soil contamination at the facility was more extensive than plant personnel reali ed. Therefore, working in conjunction

IDAHO POLE CO., CEDAR ST, BOZEMAN, MT 59715 (Continued)

with the State, Idaho Pole constructed an interceptor trench runningthe length of the property boundary to halt the movement of PCP into ground water. In August l983, EPA collected samples at the old Bo eman Landfill, including the trench running the length of the Idaho Pole property. The results showed that a considerable amount of PCP was migrating from the Idaho Pole plant. A State sample showed even higher PCP concentrations. Status June 10, l986): Idaho Pole has analy ed samples from approximately 15 ground water monitoring wellsit installed at the site under order of the State Water Quality Bureau WQB). Idaho Pole has submitted a report of the data collected and is developing alternatives for cleanup. WQB is evaluating the data. Idaho Pole recently applied for a permit under the Montana Pollutant Discharge Elimination System for the PCP-contaminated water currently discharged to the stream. EPA will continue to monitor the WQB enforcement action. EPA inspected the site in December l985 and will soon issue a report regarding the potential for an immediate removal.

Hazardous Waste Summary:

Waste Code:	D037
Waste Description:	Pentachlorophenol
Waste Code:	F032
Waste Description:	Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Currently Use, Or Have Previously Used, Chlorophenolic Formulations [Except Potentially Cross-Contaminated Wastes That Have Had The F032 Waste Code Deleted In Accordance With Section 261.35 (I.E., The Newly Promulgated Equipment Cleaning Or Replacement Standards), And Where The Generator Does Not Resume Or Initiate Use Of Chlorophenolic Formulations]. (This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.)
Waste Code:	K001
Waste Description:	Bottom Sediment Sludge From The Treatment Of Wastewaters From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.

Environmental Interest/Information System:

The Montana Department of Environmental Quality (DEQ) Consolidated Environmental Data Acquisition and Retrieval System (MT-CEDARS) allows facilities throughout the state to quickly and easily report daily air and water quality data.

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The Click here to access additional FINDS: detail in the EDR Site Report. database contains http://www.edrnet.com/srf2/FinalSiteReport.aspx?ID=4m94p9mNa9gJ2LMpr49829riNPgaB33zEgwKJWP65zLEXMSu3y7r3v4JG4sR8hW2rV5B0r6giED9qsPoHg953jlBa334h4Wym4S9Rh2W.pFP9Cf8XINfCaAF2MygtMJjp4FxL6WMaU3c0rpy4MQ2Fw8EA2po4Azrn.iAt7pzPf2gd24wTmcO9LU3lhphJ9j52kTNvGa8d9pXgeVJ7rAdtL3KMBIBUbr6r4vH6lG8rg2xN3uVrpriOu3MkPJOgrPAyeBzy3Cb14JzxoEG44aJw.AKe3uWxWJCPOU4bBmNp9823AdpSp92Q2LSNhNaU33SegMZJCm2V2LPKMiV3NXr924ih8uQ87L29t80SrPRi539fKPXAgny5GMBFz35k9AezNwEX24Bgw7RKRTBDyWdqPau2 additional records for this site. EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 NPL

site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
IDAHO POLE CO.	***CEDAR ST***	***E 1/8 - 1/4 (0.242 mi.)***	***0***	***11***
Cerclis ID:: 800379				
EPA Id: MTD006232276				

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
IDAHO POLE CO.	***CEDAR ST***	***E 1/8 - 1/4 (0.242 mi.)***	***0***	***11***
Site ID: 0800379				
EPA Id: MTD006232276				

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
DEVELOPMENTAL TECHNO	1410 N ROUSE	SW 0 - 1/8 (0.113 mi.)	C7	104
Site ID: 0800435				
EPA Id: MTD980666762				

EXECUTIVE SUMMARY

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

IDAHO POLE CO.	***CEDAR ST***	***E 1/8 - 1/4 (0.242 mi.)***	***0***	***11***
EPA ID:: MTD006232276				

Federal institutional controls / engineering controls registries

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 07/24/2024 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
IDAHO POLE CO.	***CEDAR ST***	***E 1/8 - 1/4 (0.242 mi.)***	***0***	***11***
EPA ID:: MTD006232276				
EPA ID:: MTD006232276				

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 07/24/2024 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Quality's Non-NPL Sites for Montana.

A review of the SHWS list, as provided by EDR, and dated 06/26/2024 has revealed that there are 2

SHWS sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/16/2024 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/30/2024 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
DELTA AIR LINES INC		E 1/8 - 1/4 (0.219 mi.)	12	122

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 3 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1 E MANIFEST site within approximately 0.25 miles of the target property.

WQA: Sites regulated under the Montana Water Quality Act (WQA) are addressed by the Groundwater Remediation Program. These sites typically require long-term soil, surface water, and/or groundwater remediation and and monitoring. This program addresses sites that are not addressed by the Leaking Underground Storage Tank Program, CECRA Program, Permitting and Compliance Division, or other state authorities.

A review of the WQA list, as provided by EDR, and dated 06/26/2024 has revealed that there are 2 WQA sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

NPL Status:	Currently on the Final NPL
Substance ID:	U242
CAS Number:	87-86-5
Substance:	PENTACHLOROPHENOL (PCP)
Pathway:	SURFACE WATER PATHWAY
Scoring:	4

Summary Details:

Conditions at proposal October 15, l984): Idaho Pole Co. treats wood products with pentachlorophenol PCP) on a 10-acre site in Bo eman, Gallatin County, Montana. The pole yard has been in operation since l946. Ground water is very shallowand flows to the north/northwest, where it discharges

IDAHO POLE CO. (Continued) **1000243225**

into Rocky Creek. About 1,250 people use wells within 3 miles of the site as a source of drinking water. Any ha ardous material leaking onto the ground during the wood-treatment process could contaminate ground water due to highly permeable soils and shallow ground water. A greater concern is that waste water discharged onto the surface at the facility could rapidly infiltrate the shallow ground water. The facility has ahistory of surface water problems associated with its discharges. In l978, the State investigated a complaint concerning PCP in Rocky Creek. At that time, a ditch, originating at the Idaho Pole plant and running from the plant for about200 to 300 yards before entering Rocky Creek, contained large quantities of PCP. While minute quantities were noted at the mouth of the ditch and running into Rocky Creek, large quantities had collected on the rocks and vegetation along and inthe ditch. Stains high on the sides of the ditch and on vegetation indicated that discharge had been much greater in the past. Following the investigation, the State issued a compliance order in l984 requiring Idaho Pole to take measures to eliminate discharges into Rocky Creek and to prevent the future placement of wastes in locations where they were likely to pollute State waters. Idaho Pole started work to comply with the State s order. However, because of leaking pipes,leaking tanks, and a deteriorated main pumphouse sump, soil contamination at the facility was more extensive than plant personnel reali ed. Therefore, working in conjunction with the State, Idaho Pole constructed an interceptor trench runningthe length of the property boundary to halt the movement of PCP into ground water. In August l983, EPA collected samples at the old Bo eman Landfill, including the trench running the length of the Idaho Pole property. The results showed that a considerable amount of PCP was migrating from the Idaho Pole plant. A State sample showed even higher PCP concentrations. Status June 10, l986): Idaho Pole has analy ed samples from approximately 15 ground water monitoring wellsit installed at the site under order of the State Water Quality Bureau WQB). Idaho Pole has submitted a report of the data collected and is developing alternatives for cleanup. WQB is evaluating the data. Idaho Pole recently applied for a permit under the Montana Pollutant Discharge Elimination System for the PCP-contaminated water currently discharged to the stream. EPA will continue to monitor the WQB enforcement action. EPA inspected the site in December l985 and will soon issue a report regarding the potential for an immediate removal.

Environmental Interest/Information System:
The Montana Department of Environmental Quality (DEQ) Consolidated Environmental Data Acquisition and Retrieval System (MT-CEDARS) allows facilities throughout the state to quickly and easily report daily air and water quality data.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to

IDAHO POLE CO. (Continued) **1000243225**

track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before

BAILEYS QUALITY AUTO SERVICE (Continued) **1015744682**

Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Site Summary:	IDAHO POLE COMPANY SITE BOZEMAN, MONTANA The Idaho Pole Company site is located near the northern limits of Bozeman and occupies approximately 50 acres in the east half of Section 6 and the west half of Section 5, Township 2S, Range 6E of Gallatin Co

Detail As Of March 2013:

Start Date:	01/01/1991
End Date:	04/01/1992
Report Date:	04/01/1992
Description:	Feasibility Study - Entire Site
Purpose:	Provide sufficient information to support an informed risk management decision regarding the selection of the most appropriate remedy for the IPC site. This process included developing, screening, and performing detailed analyses of potential remedial alternatives.

Contaminant:

Sphere:	Groundwater
Contaminant:	Dioxins/furans
Observed:	Yes

IDAHO POLE CO (Continued) **S107982034**

Low Depth:	40
Matieral Volume:	210,000,000 gal.
Receptor:	Residence
Distance:	1320
Area Impacted:	61 ac
Remark:	Spillage of oil wood-treating fluid has resulted in groundwater contamination on and off site. Since the oily wood-treating fluid is an LNAPL, a product layer exists beneath the site and above the groundwater. Contaminated groundwater has migrated from the pole plant area north and east towards Rocky Creek and a residential area.
Sphere:	Groundwater
Contaminant:	PAH
Observed:	No

Summary:

Object ID:	158
Facility ID:	31517
Summary:	MDT-Bozeman Maintenance Facility August 25, 1998 The Montana Department of Transportation (MDT) Bozeman Maintenance Facility conducted a site investigation to evaluate the extent of diesel impacted soil and groundwater resulting from the release of diesel fuel and road oil at the facility. The release was discovered during the removal of a concrete vault that contained road oil. The site is located at 907 N. Rouse Avenue, Bozeman in the SE ?, of the SW ? of Section 6, Township 2S, Range 6E, of Gallatin County. During the removal of the concrete vault, debris, solidified petroleum (road oil) and approximately 225 cubic yards of impacted soil were excavated. Samples of the solidified oil and impacted soil were collected and analyzed at Energy Laboratories of Billings, for the presence of benzene, ethylbenzene, toluene, xylenes (BETX) and Toxicity Characteristic Leaching Procedure (TCLP) Metals, to determine if the materials were to be accepted in the Lewis and Clark Landfill. Results from the sample analyses indicated non-detect levels of BETX and TCLP Metals. The soil and the road oil product were then transported for disposal at the Lewis and Clark Landfill. During the transportation to the landfill, the impacted soils froze in the back of the dump trucks and had to be removed with a backhoe. Additional excavated soil was then stockpiled on-site. During the Phase II investigation on December 10 and 11, 1998, Olympus Environmental, Inc. (Olympus) discovered three inch piping four feet below ground surface (bgs). The piping was not removed due to frozen ground and the potential to disturb the adjacent underground utilities. However, the piping was grouted closed prior to backfilling the excavation. Groundwater at the site was encountered at 12 feet bgs and had a layer of heavy film of free product. In addition, three confirmation soil samples were collected from the excavation and analyzed for the presence of total petroleum hydrocarbons (TPH). Also, a groundwater sample was collected from the bottom of the excavation and analyzed for diesel range organics (DRO). Results from the confirmation samples indicated that soil sample #7350-2 at 41,900 parts per million (ppm) TPH exceeded the Montana Department of Environmental Quality (DEQ) regulatory action level of 100 ppm TPH. After review of the January 26, 1998 Olympus

MDOT MAINTENANCE FACILITY BOZEMAN (Continued) **S111099195**

Remedial Excavation Letter, the Department of Environmental Quality (DEQ) required that additional work be conducted at the site. During May 28 through June 3, 1998 the following activities were performed by Olympus: the remaining impacted soils (approximately 75 tons) were transported and disposed of at the Lewis and Clark County Landfill; three soil borings were completed and samples were collected from each boring and analyzed for DRO; the three soil borings were converted to monitoring wells after the soil samples were collected; and the monitoring wells were also sampled and analyzed for DRO. The analytical results from the soil samples reported DRO levels ranging from non-detect at 11 feet bgs to 31 milligrams per kilogram (mg/kg) at 7 feet bgs. Also, DRO as diesel in the soil samples were found to be non-detect in all three borings, and total extractable hydrocarbons (TEH) concentrations ranged from 24 mg/kg at 11 feet bgs to 69 mg/kg at 7 feet bgs. Groundwater analyses for DRO indicated all three samples to be at non-detect levels for DRO, DRO as diesel, and TEH. Three additional quarterly monitoring events are to be conducted to determine the DRO concentrations in the groundwater. If the three monitoring events indicate that the DRO levels in the three wells remain non-detect, a no further action status may be granted by the DEQ. The Montana Department of Environmental Quality Remediation Division Groundwater Remediation Program is the lead regulatory program for the site and ranked it a high priority.

BOZEMAN OLD CITY LANDFILL (Continued) **S107981983**

Summary:

Object ID:	280
Facility ID:	31402
Summary:	April 4, 1996 Bozeman Old City Landfill, north of Griffin Drive in Bozeman, is an inactive, approximately 30-acre municipal landfill which operated from 1962 to 1970. The city now leases the site to Montana Department of Fish, Wildlife & Parks as part of the East Gallatin Recreation Area (formerly known as Glen Lake). Because of the old landfill's proximity to the public swimming lake and the East Gallatin River, concern exists about the possibility of landfill leachate affecting groundwater and surface water. The landfill is located on Bozeman's north side in a lightly populated area. Several residences and a trailer park within a few hundred feet of the landfill and recreation area have domestic groundwater wells. The East Gallatin River, a cold water fishery, flows along the east boundary of the landfill. The recreation area is heavily used in summers for swimming. A 1983 CERCLA preliminary assessment by MDHES summarized the contamination potential from landfill leachate and indicated a site investigation was warranted. During a 1983 CERCLA site investigation, EPA consultants sampled soils, groundwater from nearby domestic wells, and sediments and surface water of Glen Lake and East Gallatin River. No contamination was detected in groundwater, and no significant exceedances of background values were found in soils. Some surface water and sediment samples contained very low levels of a few organic and inorganic compounds. None of the contaminant levels were considered significant. Based on investigation and health risk assessment results, EPA declared the facility "No Further Action" under CERCLA. In 1988-89, Gallatin Conservation District applied for and received a grant to: cover, contour and revegetate the old landfill to reduce dust, infiltration, and direct contact hazard; stabilize the East Gallatin river banks to reduce erosion in the landfill vicinity; conduct weed control; and perform water quality monitoring of groundwater and the lake. Contractors for the District completed the work in 1991. From 1988 through 1991, MDHES conducted annual sampling of the lake and groundwater via a network of monitoring wells installed around the old landfill. Most of the organic compounds detected in 1983 were not detected in the more recent sampling events. Occasionally some of the wells showed very low levels of a few organic compounds. This is not unusual given the urban setting and nearby industrial areas along Rouse and Griffin Drives. No exceedances of primary drinking water standards have been found. The Montana Department of Environmental Quality (MDEQ; formerly MDHES) CECRA program is the lead regulatory program for the site and ranked it a low priority. Continued lake and groundwater sampling would help to ensure public health and safety. CECRA plans no other actions at this time.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER RELEASE: UST Finder Releases Database
US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

UST FINDER: UST Finder Database
EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

PFAS: PFOA & PFOS Site Listing
Perfluorinated Compounds (PFCs) are a very large group (more than 3000) of human-made chemicals that contain at least one fluorine atom. The family of PFCs has widely differing physical, chemical and biological properties, but are principally known for their ability to impart stain/water resistant properties to products. PFCs are used in automotive, electronics, firefighting and construction industries.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Longitude (West):	111.027999 - 111° 1' 40.80''
Universal Tranverse Mercator:	Zone 12
UTM X (Meters):	497820.1
UTM Y (Meters):	5060004.5
Elevation:	4743 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	15007544 BOZEMAN, MT
Version Date:	2020

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

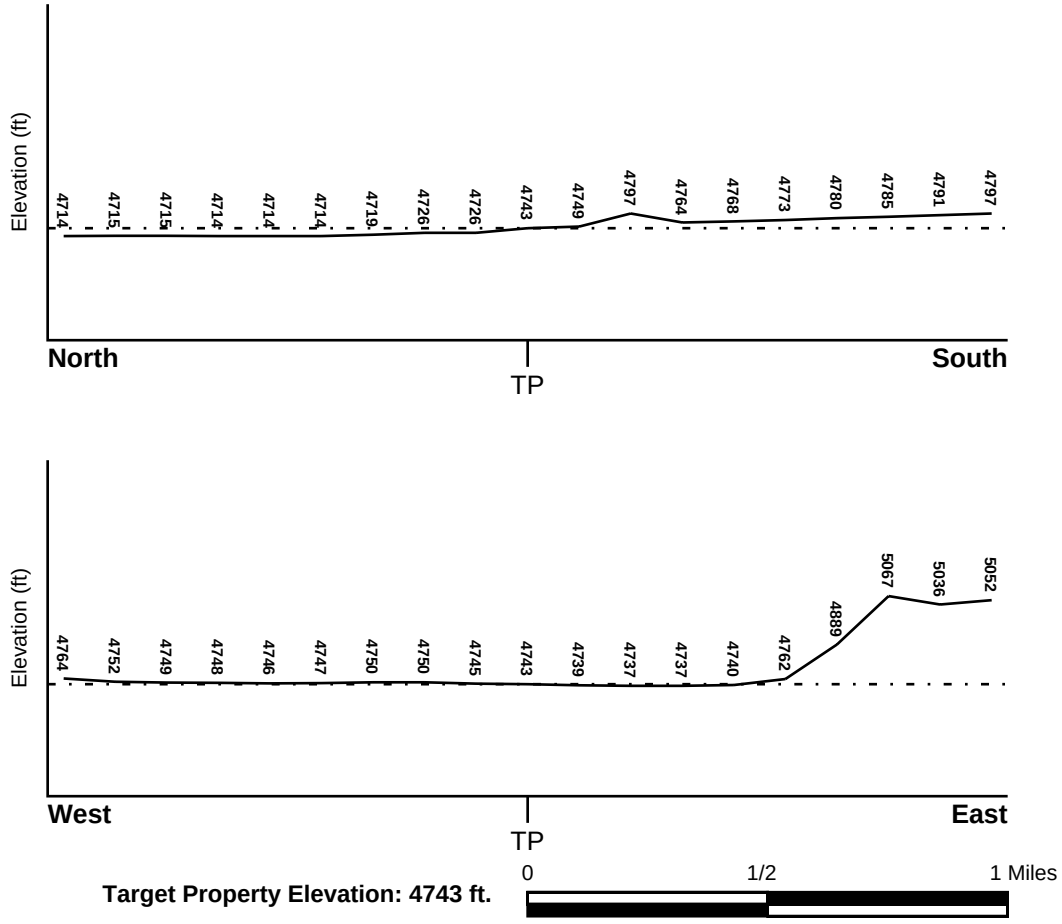

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
30031C0809D	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
30031C0808D	FEMA FIRM Flood data
30031C0816D	FEMA FIRM Flood data
30031C0817D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BOZEMAN	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Blossberg

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	loam	Not reported	Not reported	Max: 141 Min: 42	Max: 7.8 Min: 6.6
2	14 inches	24 inches		Not reported	Not reported	Max: 141 Min: 42	Max: 7.8 Min: 6.6
3	24 inches	59 inches		Not reported	Not reported	Max: 141 Min: 42	Max: 7.8 Min: 6.6

Soil Map ID: 2

Soil Component Name: URBAN LAND

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class:

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Enbar

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	22 inches	loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	22 inches	48 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4
3	48 inches	59 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4

Soil Map ID: 4

Soil Component Name: Enbar

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 84 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	22 inches	loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	22 inches	48 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4
3	48 inches	59 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4

Soil Map ID: 5

Soil Component Name: Water

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EDR Environmental Lien and AUL Search 1980

The EDR Environmental Lien and AUL Search 1980 report provides results from a search of available land title records for environmental cleanup liens and other activity and use limitations (AULs), such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address and/or parcel information to:

- search for parcel number and/or legal description
- search for ownership information filed between 1980 and the most current publicly available date
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.
- search for publicly available environmental encumbering instrument(s) filed between 1980 and present
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Property Archives, LLC researched and compiled the land title information contained in this EDR Environmental Lien and AUL Search 1980 report on behalf of EDR.

For Value Received CHESTER D. AMBERSON and PATTI LOU AMBERSON, husband and wife, of Belgrade, Montana,

the grantors, do hereby grant, bargain, sell, convey and confirm unto JOSEPH D. MAHURIN, of Bozeman, Montana,

the grantee, the following described premises, in Gallatin **County, Montana, to wit:**

Tract 6-A of Certificate of Survey No. J-42-A, a tract of land located in the Northeast Quarter (NE¼) of Section Six (6), Township Two (2) South, Range Six (6) East, P.M.M., City of Bozeman, Montana, said tract being Tracts 5 and 6 of the Industrial Properties Subdivision, Gallatin County, Montana.

TOGETHER WITH the tenements, hereditaments, and appurtenances thereunto belonging or in anywise appertaining thereto.

SUBJECT TO any and all easements, rights of way, restrictions, and reservations of record.

Title Co.

TO HAVE AND TO HOLD the said premises, with their appurtenances unto the said Grantee, his heirs and assigns forever, And the said Grantors do hereby covenant to and with the said Grantee, that they are the owners in fee simple of said premises; that they are free from all incumbrances

and that they will warrant and defend the same from all lawful claims whatsoever.

EXPERIENCE SUMMARY

Ryan Kizer possesses a diverse and extensive background that spans multiple fields, including oil and gas, construction, and environmental science. With six years of experience in the oil and gas industry, he has developed proficiency in sampling, reporting, logging, and geosteering. Ryan is skilled in building geo-logs based on drilling operations, rock samples, and gas and gamma readings, and he has a strong knowledge of stratigraphy and seismic readings. His hands-on experience working on drill rigs has equipped him with a deep understanding of safety protocols around large machinery, and he has management experience supervising teams of up to 25 employees during 24-hour work periods.

In addition to his oil and gas experience, Ryan has seven years of experience in the construction industry as a carpenter, which has provided him with knowledge of building structures and safety practices in the field. He is familiar with building codes and adept at reading and interpreting blueprints, and he has a solid understanding of asbestos remediation processes. His construction background gives him insight into the design and construction of structures, plumbing, electrical systems, and foundations, enabling him to identify potential leaks, contamination, and suspect materials.

Furthermore, Ryan has two years of experience in the environmental field, where he has engaged in environmental sampling, including Asbestos Containing Material (ACM) and Lead-Based Paint (LBP) sampling. He holds a remote pilot license, enhancing his capabilities in aerial surveying and data collection. Throughout his environmental work, he has conducted multiple sampling events, groundwater well installations, and Phase I Environmental Site Assessments (ESAs). He is proficient in various sampling techniques, including core, direct push, air rotary, and split spoon sampling, and has experience creating detailed drill logs of lithology.

Ryan's technical skills include a strong analytical ability for interpreting geological and environmental data, as well as experience in construction oversight and compliance with safety regulations. As an effective team leader, he is capable of managing projects while ensuring adherence to safety and quality standards. His ability to communicate complex technical information clearly to diverse audiences, along with his experience in reporting and documentation related to environmental and geological findings, further enhances his qualifications. Overall, Ryan Kizer's multifaceted experience in the oil and gas, construction, and environmental sectors, combined with his management skills and technical expertise, positions him as a valuable asset in any project requiring a comprehensive understanding of geological, environmental, and construction principles. His commitment to safety and quality further underscores his qualifications in these fields.

RELEVANT EXPERIENCE

LA Fire Response, Pacific Palisades CA, 2025. Ryan Kizer was on location for the Pacific Palisades fire where he was sampling for ACM in the burned down structures to clear the area for demolition.

Helena Housing Authority, Helena MT, 2025. Ryan Kizer managed and sampled an ACM and LBP investigation in an apartment building for them to do renovations.

Bull Run, Helena MT, 2025. Ryan Kizer managed and sampled soil with a hand auger on a private residence for a RCRA 8 metals investigation. The samples were collected, sent to the lab, and a report was made for the client in a appropriate manner due to a hard deadline.

ACM Smelter, Black Eagle MT, 2024. Ryan Kizer was contracted by the EPA to do oversight on yard remediations in Black Eagle Montana. The work included observing construction crews remove contaminated yard soils that contained lead and arsenic and then replacing the yards with clean soil. Ryan was responsible for walking the yards with the owners and explaining the scope of the project per yard. While the crews were working Ryan was responsible for verifying each yard that the correct amount of soil and the correct area was removed. Over 50 yards were excavated and replaced.

Brownfields TBA Petroleum County Courthouse, Winnett MT, 2024. Ryan Kizer executed a Phase II Addendum at Petroleum County Courthouse which involved sampling the roof for ACM.

Kootenai Business Park, Libby MT, 2024. Ryan Kizer was involved in testing Surface water, sediments, surface soil, subsurface soil, and ACM. At an old lumber mill in Libby MT. Samples were tested for VPH, EPH, MADEP, and lead. A photoionization detector (PID) was used for locating sample intervals.

DEQ PTC/PTRCB- Alpine Animal Hospital/Former Noon's, Helena MT, 2023. Ryan Kizer has done a Bi-annual groundwater monitoring event using a peristaltic pump or bladder pump. Checking for depth of water and taking samples for metals, phosphorus, nitrogen, VPH, EDB & EDC, and VOCs.

RAES CTS2, Cove AZ, 2023. Ryan Kizer was the field lead on drilling oversight on a sonic/coring rig. Geophysical studies in the area for Uranium depositories consisted of drilling for split spoon samples, shelby tubes, bulk samples, and cores. Void drilling into abandoned mine shafts was the second part using geophysical surveys and historical mine maps trying to intercept voids for Uranium slurry to be pumped into.

DEQ PTC- Green Meadow Market, Helena MT, 2023. Ryan Kizer was the field lead on drilling oversight for a Geoprobe rig using split spoon samples and to develop groundwater monitoring wells. Soil samples and ground water samples were taken looking for a previous petroleum release at the gas station. Soils were collected to be tested for VPH and groundwater samples were collected using a peristaltic pump and tested for VPH and EPH.

Montana Pole, Butte MT, 2023. Ryan Kizer assisted with construction oversight. Construction entailed installing straw wattles and silt fence over eroding areas to prevent erosion. Trenches and ponds were excavated to ensure flooding events could not disrupt the soil that was deposited there. Machines used were an excavator, mini excavator, front loader, and a skid steer.

Private Phase II- Thompson Distributing, Hamilton, MT 2023. Ryan Kizer was the field lead on drilling oversight on a split spoon Geoprobe. Some soil borings were developed to groundwater monitoring wells. Surface and subsurface soil samples were also taken by hand using shovels. Soil samples were analyzed for VPH, 8011, 8260b, SVOCs, metals, and EPH. A photoionization Detector (PID) was also used to analyze the soil samples. Groundwater was collected using a peristaltic pump and analyzed for VPH, 8260b for 1,2 DCA and 8011 for EDB, and VOCs.

Silver Dyke Mine, Neihart, MT 2023. Ryan Kizer was involved in the drilling oversight for a sonic drill rig. We were drilling above a suspected mine adit according to geophysics trying to drill into the adit void. This was to investigate how much water was in the adit to see if it could be opened. Once completed casing was installed for a permanent monitoring hole into the adit. Technology used to complete required work included ArcGIS Field Maps, ArcGIS Survey 123, and Microsoft Suite.

Flandreau Tribal Housing Project, Flandreau SD, 2023. Ryan Kizer was part of ACM sampling throughout an abandoned house. Assisted with LBP testing using an XRF. Did soil samples and a hazardous waste inventory on the property.

Ash Grove, Montana City MT, 2023. Ryan Kizer was the field lead on drilling oversight on air rotary drilling rig for installing a groundwater monitoring well. Ryan Kizer logged and sampled the lithology while drilling.

Spirit Lakes, St. Michael ND, 2023. Ryan Kizer was part of the field team during ACM inspection/sampling in multiple different residential and commercial buildings. He assisted with photolog creation and pictures taken in field. Technology used to complete required work included ArcGIS Field Maps, ArcGIS Survey 123, and Microsoft Suite.

Brownfields TBA Dr. Neal Rogers Building, Butte MT, 2023. Ryan Kizer was the field lead on an underground Storage Tank (UST) removal project. An excavator and front loader were used to dig through the parking lot following pipes and USTs. Composite and discreet soil samples were taken around all pipes and tanks for metals, VOCs, and VPHs. Tank removal, disposal, and petroleum release notifications were required. Ryan Kizer also assisted with ACM sampling inside the building.

Brownfields TBA Helping Hands 2, Hardin MT, 2023. Ryan Kizer did soil grab sampling in 3' test pits for VOC's, SVOC's, RCRA 8 metals and herbicides and pesticides. He also ran groundwater monitoring and sampling using a peristaltic pump testing for VPH, EPH, Lead Scavengers VOCs, SVOCs, herbicides and pesticides, and RCRA 8 Metals.

Brownfields TBA Petroleum County Courthouse, Winnett MT, 2023. Ryan Kizer assisted with ACM sampling and ambient outdoor and indoor air sampling using 8-hour summa canisters.

Brownfields TBA Madison Apartments, Great Falls MT, 2023. Ryan Kizer Identified PCBs throughout the structure. He also assisted with documenting lead sampling readings via XRF and assisted in sub-slab vapor probing using 24-hour summa canisters.

EMPLOYMENT HISTORY

Feb 2023- Present	Environmental Geologist, Tetra Tech Inc, Helena, MT
Jul 2019 – Feb 2023	Lead Carpenter, Abraham Construction Services, Helena, MT
Jul 2017 – Jul 2019	Carpenter, Seaman's Home Improvement and Construction, Missoula, MT
Jun 2015 – May 2017	Carpenter/Laborer, Strong Construction, Homer, AK
Jul 2013 – Mar 2015	Geosteering Coordinator, Chesapeake Energy Corporation, Oklahoma City, OK
Feb 2012 – Jul 2013	Geosteering Supervisor, Nomac Services LLC, Oklahoma City, OK
Aug 2010 – Feb 2012	Mudlogger/Geosteering Supervisor, Horizon Well Logging, LLC, Tulsa, OK

TETRA TECH

Katie Erny
Geologist

EXPERIENCE SUMMARY

Ms. Katie Erny has over 16 years' experience as a geologist and project manager in the environmental science and spill remediation field. Her experience is primarily in environmental contaminant investigation, multi-media remediation, Brownfields, air monitoring and reporting for private sector and government clients including the U.S. Environmental Protection Agency (EPA). Ms. Erny has experience with sampling design and data collection for all types of media from soil, soil gas and sediment to groundwater and surface water. She has conducted multiple underground storage tank removal projects and soil and groundwater remediation. Ms. Erny has extensive experience with logging soil borings and determining monitoring well installation specifics. Ms. Erny is currently a Region 8 START Brownfields lead for the states North Dakota and South Dakota. She manages targeted brownfield assessment sites in both EPA Region 5 and Region 8. Ms. Erny's previous experience has been a project manager with the Indiana Brownfields Program and managed numerous petroleum orphan site initiative (POSI) sites and other Brownfields sites which included former gas stations and/or abandoned properties from Phase I environmental site assessments (ESAs) through closure of the site. She wrote Revolving Loan Fund (RLF) Subgrants and POSI bid proposals for environmental site assessment, UST removal and environmental remediation services for multiple sites in Indiana. Other project management duties included hosting meetings with consultants and stakeholders, traveling and overseeing field work, and working with other IDEM programs on managing same sites. Also wrote, reviewed and provided technical comments for No Further Action letters, Environmental Restrictive Covenants, Site Status Letters and Comfort Letters. The projects below highlight a few examples of her relevant experience.

RELEVANT EXPERIENCE

Site Characterization and Time-Critical Remediation

Goose Lake Tronox Preliminary Assessment, Cooke City, Park County, Montana. EPA Region 8. August 2024 – Present. Project manager that has attended meetings with EPA to determine scope of work and deliverables. Developed Trip Report and a Abbreviated Preliminary Assessment report to document soil and groundwater samples from multiple mines at the site.

Williamson Polishing & Plating Site, Indianapolis, IN. EPA Region 5. February 2024 – Present. Project manager that has led all START work for mitigating vapor intrusion by sampling sub-slab soil gas and indoor air sampling at residential properties near tetrachloroethene (PCE) and trichloroethene (TCE) groundwater plumes during seasonal events. She has also assisted the EPA with community outreach and local agency relations.

EDUCATION

B.S., Geology, Illinois State University, Normal, IL, 2007

Geologic Field Camp, Illinois State University, Wyoming, Montana, South Dakota, 2006 and 2019

AREAS OF EXPERTISE

Project Management

Technical reporting/review

Field Sampling and Oversight

Multi-media remediation

Brownfields

Phase I and Phase II ESAs

KEY TRAINING/ CERTIFICATIONS

40-hour OSHA Hazwoper with Current 8-hour Refresher

30-hour OSHA Construction Safety

ICS Level 100, 200, 700 and 800

CPR/AED & First Aid Certified 2022

ASTM International Continuing Obligations Course Training

EPA classroom training course for best management and technical practices for assessment and remediation

OFFICE

Katie.erny@tetratech.com

Refined Metals Site Assessment, Beech Grove and Indianapolis, IN. EPA Region 5 START V. February 2024 – October 2024. Project manager during the city-owned properties and residential surface soil sampling assessment to determine nature and extent of released materials.

My Way Trading Warehouse Fire Site, Indianapolis, IN. EPA Region 5. May 2023 – October 2024. Ms. Erny assisted the project manager for two time-critical removal evaluation sampling events of fire debris and building wastes at the four properties consumed by the fire. Samples were collected for volatile organic compounds (VOC), semi-volatile organic compounds (SVOC), polychlorinated biphenyls (PCB), and most frequently asbestos in building materials. Ms. Erny assisted in developing a removal evaluation report, sampling and analysis plans, and revised data tables at EPA's request.

Dixon Road Site, Kokomo, IN. EPA Region 5. 2017 – Present. Ms. Erny provided oversight of a PCBs removal involving treating soils with a heavy metal reduction agent to render the soil as non-hazardous waste for metals prior to off-site disposal.

Brownfields Redevelopment

Lower Brule Sioux Tribe (LBST) Burn Sites, Targeted Brownfields Assessment Site, Lyman, South Dakota. EPA Region 8 START V. October 2024 – January 2025. Project manager who managed the development of the sampling and analysis plan and crosswalk for EPA approval. The site consists of five residential and two commercial properties located in Lower Brule, South Dakota, which are all currently vacant with no structures. All seven structures previously located on the properties are known to have been involved in structural fires, with all sites being in a post-burn state. There were various amounts of burned debris and structural elements on the sites in the aftermath of fire damage. The structures were demolished, debris was cleared, and the properties are now vacant with overgrown vegetation. Based on the ages of the former structures, asbestos-containing material (ACM) may have been present in the structures and therefore might be present in soils following fires. Additionally, fire-related Resource Conservation and Recovery Act (RCRA) metals were analyzed in the on-site soils. START collected composite soil samples at all seven sites. Ms. Erny developed the Phase II ESA Report for EPA approval.

Spirit Lake Nation, Targeted Brownfields Assessment Site, Benson County, North Dakota. EPA Region 8 START V. April 2024 – August 2024. Project manager for the Phase II ESA at 23 properties on the Spirit Lake Nation Reservation in North Dakota. Ms. Erny developed the SAP and crosswalk for EPA approval. The site consists of a mix of vacant, unoccupied, newly built or abandoned buildings. The properties included in this survey are owned by Spirit Lake Nation, which plans to demolish or renovate the structures depending on their condition and findings of this investigation. Properties are in St. Michael, Tokio, Oberon, Fort Totten, Warwick and Sheyenne, North Dakota. Based on the ages of the structures, START collected building material samples for asbestos and used a XRF to screen the structures for lead-based paint (LBP). START also conducted sampling for methamphetamine in some of the housing units. Meth was detected in all housing units. Ms. Erny attended meetings with EPA and the Spirit Lake Tribe and helped provide guidance to the Spirit Lake Nation by providing the EPA cleanup procedures for the meth contaminated areas within the structures. A Phase II ESA Report was developed and approved by EPA. Ms. Erny developed 23 Property Information Summary forms for each property and submitted to EPA for approval.

North and South MLK Corridor Sites, Targeted Brownfields Assessment, Indianapolis, Indiana. EPA Region 5 START V. September 2023 - present. Ms. Erny is the project manager and is managing the scope of work and cost estimate for the Phase II ESAs at both the North and South MLK Corridor sites. She developed a sampling and analysis plan and site specific QAPP addendum for the Phase II site assessment that will include the assessment of soil, groundwater, soil gas, and hazardous building materials. The North MLK Corridor site is defined as a 1.49-acre property comprised of nine parcels and the South MLK Corridor site is defined as a 2.11

acre property comprised of nine parcels. The North MLK Corridor site was first developed in 1898 and operated as an auto-repair shop, dry cleaners and a tin shop. Based on the age of the on-site building, there is a potential for lead-based paint and asbestos containing material. Based on review of previous investigations, soil and groundwater on the site have been impacted with chlorinated solvent and petroleum constituents at concentrations above state screening levels. Furthermore, soil and groundwater contamination at the site has not been fully delineated. The South MLK Corridor site was first developed in 1898 with residences and a horse and saddle shop. From 1915 to 1970 the commercial properties on the site operated as a tailor, a dry cleaner, rug cleaning business, printing shop and restaurants. Based on previous Phase I assessments, the South MLK Corridor site had multiple recognized environmental conditions from the historic facilities that operated for decades. The current owners are interested in demolishing the vacant on-site structures and rebuild for residential use or commercial use.

Nederland Old Town Shop, Targeted Brownfields Assessment, Boulder County, Nederland, Colorado. EPA Region 8 START V. March 2024 – present. Project manager that is managing a Phase I Environmental Site Assessment to be conducted at the property to provide guidance for a Phase II ESA. Based on the Phase II ESA results, Ms. Erny will provide the EPA and Town of Nederland a cleanup cost estimate for redevelopment of the site as a childcare center or housing. EPA requested a Phase I ESA refresh in November 2024. START is in the process of developing the Phase I ESA refresh.

Yankton Multi-site TBA, Targeted Brownfields Assessment, Charles Mix County, Marty, South Dakota. EPA Region 8 START V. May 2024 – October 2024. Project manager who developed a sampling and analysis plan and crosswalk for EPA approval. The site consists of seven properties that based on the age of the structures had the potential for asbestos containing materials and lead-based paint to be present. START mobilized to the seven structures to conduct the hazardous building material assessment. Ms. Erny developed the Phase II ESA Report that summarized the findings to EPA for approval.

Flandreau TBA, Targeted Brownfields Assessment, Moody County, Flandreau, South Dakota. EPA Region 8 START V. July 2024 – November 2024. Project manager who developed the sampling and analysis plan and crosswalk for EPA approval. Coordinated site sampling event with START field scientist. Conducted hazardous building assessment by sampling for asbestos and screening for lead-based paint. Provided a hazardous material summary report to EPA.

Weir Building, Targeted Brownfields Assessment, Musselshell County, Roundup, Montana. EPA Region 8 START V. March 2024 – September 2024. Project manager who is managing a Phase I Environmental Site Assessment to be conducted at the vacant Weir Building and who will provide a Project Planning and cleanup cost estimate for removal of asbestos containing materials and renovation of lead-based paint windows within the subject property. Ms. Erny followed the guidance that is required by Historic Tax Credits for removal of all windows, lead-based paint removal, and restoration as part of the brownfield cleanup grant in order to qualify for historic tax credits. In addition, Ms. Erny followed the HUD requirements for removal of all lead containing paint as opposed to lead-based paint (1.0 mg/cm2) to follow HUD standards. Ms. Erny will develop a structural assessment and feasibility study for the County. The county and community of Roundup would like to redevelop the property for potential housing and new commercial space.

GES Coalition – 4709 Race Street, Targeted Brownfields Assessment, Denver County, Colorado. EPA Region 8 START V. February 2024 – present. Project manager who has developed a Phase I Environmental Site Assessment report for the properties at 4707 and 4709 Race Street in Denver. The Phase I ESA documented recognized environmental conditions (RECs) and business environmental risks (BERs) associated with the residential building on the site. Ms. Erny provided EPA with a sampling and analysis plan for a Phase II ESA to be conducted at the site. A cleanup cost estimate will be provided to EPA once the Phase II ESA is completed.

Spirit Lake Nation, Targeted Brownfields Assessment Site, Benson County, North Dakota. EPA Region 8 START V. June 2023 through October 2023. Ms. Erny is the project manager for the Targeted Brownfields Assessment at the Spirit Lake Nation in St. Michael, Tokio, Sheyenne, and Tokio, North Dakota. The TBA

conducted at the site include hazardous building materials surveys of four residential units and one former restaurant/grocery store building. The hazardous building surveys included collecting suspect asbestos containing materials (ACM) samples and screening for lead-based paint (LBP). Ms. Erny is leading the investigation to develop a conceptual remedial action plan to address the abatement of building materials.

Gibson Solar Comfort Letter and Gibson Solar Switchyard Phase I ESA, Gibson County, Indiana. Gibson Solar. March 2023 through present. Ms. Erny assisted the Project Manager with contacting State officials and has attended meetings with the State of Indiana Finance Authority (IFA) to request a Comfort Letter for Gibson Solar to receive a Comfort Letter so they can have liability coverage when redeveloping leased properties for solar panels that are near the Gibson County Landfills. She supported the Phase I ESA by visiting the site and completed a photo log for the Gibson Solar. Ms. Erny is part of the review team for the process of requesting a Comfort Letter and submitting the appropriate applications to the IFA.

Hug Street Property, Elkhart, IN. EPA Region 5 START V. Targeted Brownfields Assessment (TBA). November 2022 – April 2024. Ms. Erny is the project manager for the Targeted Brownfields Assessment at the Hug Street Property. Ms. Erny conducted the Phase I environmental site assessment and will be leading the Phase II environmental site assessment. Ms. Erny led the soil, soil gas, and groundwater investigation and provided soil and groundwater remediation alternatives.

Brightwood Shopping Plaza Site, Indianapolis, IN. EPA Region 5 START V. Targeted Brownfields Assessment (TBA). November 2022 – January 2023. Ms. Erny is the project manager for the Targeted Brownfields Assessment at the Brightwood Shopping Plaza that is in a mixed-use commercial, residential, and industrial area. At the time of this assessment, the shopping center included 10 suites within the 42,490-square-foot building. Historically, the Site was first developed prior to the 1890s for commercial use as part of a larger railroad yard that consisted of a roundhouse and then transitioned into a drycleaning facilities. Ms. Erny conducted the Phase I environmental site assessment of the Brightwood Shopping Plaza for the Martindale Brightwood Community Development Corporation (MBCDC). Ms. Erny also led a hazardous building materials survey that consisted of asbestos-containing material sampling and survey.

NewPorte Landing North Site, La Porte, IN. EPA Region 5 START V. Targeted Brownfields Assessment (TBA). September 2022 – October 2023. Project manager who developed a Sampling and Analysis Plan for Phase II environmental site assessment for soil, groundwater, and soil gas sampling at the 50-acre site. The site consists of the former Allis Chalmers Trust (eastern portion) and former Dye (western portion) properties. The historical use of the site was industrial. Industrial development began with a foundry on the Dye property (western portion) in 1916, and considerable fill material including foundry sand and furnace dust had been placed. The primary concern regarding the site is the potential for exposure to contamination from the former industrial uses of the site, including the past presence of materials for construction activities, the previous storage of finished vehicles, the site's use as a tillage test site, and the disposal of foundry sand, fly ash, cinders, slag, and possibly waste paint. Drums were also reportedly stored and/or disposed on site, and the western portion and eastern portion of the site were former foundry properties. The City of La Porte would like to redevelop the site for a Senior living building and a Nature trail and park as part of their Healthy Living development plan. Ms. Erny led the soil, soil gas, and groundwater investigation and provided soil and groundwater remediation alternatives.

Roundhouse Site, Elkhart, IN. EPA Region 5 START V. Targeted Brownfields Assessment (TBA). August 2022 – April 2024. Project manager who developed a Sampling and Analysis Plan for Phase II environmental site assessment for soil, groundwater, and soil gas sampling at the site. The site historically contained two roundhouses. Numerous railroad spurs radiated from the roundhouses and joined the main railroad to the north of the site. Roundhouses enabled turn-around, repair, and storage of locomotive engines and featured drop pits below the floor surface to allow locomotive repair. Previous investigations encountered soil and groundwater contamination associated with the historic operations at the site. The City of Elkhart would like to redevelop the site for residential use. Ms. Erny is leading the investigation to develop a conceptual remedial action plan to address contamination identified in the soil, groundwater and soil gas. Sample analytical results will be compared

to IDEM's R2 screening levels to evaluate site conditions for closure and residential use. Ms. Erny is led the soil, soil gas, and groundwater investigation and provided soil and groundwater remediation alternatives. In November 2023, project manager who developed a Sampling and Analysis Plan for additional groundwater, soil and potential asbestos containing materials at the site.

GrowHaus, Sample and Analysis Plan (SAP), Denver, CO. EPA Region 8 START V. August 2022 – September 2022. Project manager who is developing a SAP for a Targeted Brownfields Assessment (TBA) site that is located in a mix industrial and commercial area. Ms. Erny is researching the history of the surrounding areas to determine what chemicals of concern could be on the surface and/or subsurface from the historical industrial use of the surrounding properties.

Former Britsch Wholesale Distribution, Phase I ESA and Phase II ESA, Wauseon, Ohio. Ohio EPA and Fulton County Economic Development Corporation. June 2022 to July 2022. Project manager who conducted the Phase I site reconnaissance at the former Britsch property that use to consists of 22 above ground storage tanks of industrial oils and hydraulic oils and also had a historic railroad track traverse on the site. Ms. Erny identified the recognized environmental conditions (RECs) and wrote the Phase I ESA report and recommended a Phase II ESA be conducted at the site to determine the magnitude and extent of contamination in the subsurface. In July 2022, Ms. Erny completed the Phase II ESA by advancing 18 soil borings on the site and collected soil and groundwater samples to help determine the chemicals of concern in the subsurface. The Phase I ESA and Phase II ESA was funded through the Ohio Department of Development (ODOD) Brownfields Grant Program.

Zeller Property, Phase I ESA, Defiance, Ohio. Ohio EPA and Defiance County Land Reutilization Corporation. June 2022 to July 2022. Project manager who conducted the site reconnaissance at the 4.2-acre site that was developed in 1905 and historically consisted of numerous industrial manufacturing operations till 2001. Ms. Erny wrote the Phase I ESA report and identified the RECs for a Phase II ESA. The Phase I ESA was funded through the Ohio Department of Development Brownfields Grant Program.

Brownfields Petroleum Orphan Site Initiative (POSI) in Indiana. 2017 to 2021. Ms. Erny was a project manager for the Indiana State Brownfields program and managed numerous POSI sites and other Brownfields sites which included former gas stations and/or abandoned properties from Phase I ESAs through closure of the site. She wrote Revolving Loan Fund (RLF) Subgrants and POSI bid proposals for environmental site assessment, UST removal and environmental remediation services for multiple sites in Indiana. Other project management duties included hosting meetings with consultants and stakeholders, traveling and overseeing field work, and working with other IDEM programs on managing same sites. Also wrote, reviewed and provided technical comments for No Further Action letters, Environmental Restrictive Covenants, Site Status Letters and Comfort Letters.

Long-Term Remedial Action Projects

Keystone Corridor Ground Water Contamination Superfund Site, Operable Unit 2; Indianapolis, IN. EPA Region 5. 2023 – Present. Ms. Erny assisted the START project manager with developing a site-specific quality assurance project plan (QAPP) for installing 20 deep and shallow groundwater monitoring wells, sampling subsurface soil, and conducting groundwater monitoring for nearly 40 wells downgradient of the former dry cleaner's source property. Soil and groundwater were sampled for chlorinated VOCs, chloroform, and monitored natural attenuation (MNA) analytical and field parameters. Also, she assisted in low-flow groundwater sampling at the installed deep and shallow groundwater monitoring wells.

Pike and Mulberry Streets PCE Plume Superfund, Martinsville, IN. EPA Region 5. 2021 – 2022. In 2022, Ms. Erny assisted the START project manager with sub-slab pressure field extension (PFE) testing for designing

vapor intrusion mitigation systems. He assisted with mapping interior building floorplans using an application called Magic Plan which uses Lidar technology.

Western Tar Products Site; Terre Haute, IN. EPA Region 5. March 2022 to May 2022. Project manager who developed a site-specific Quality Assurance Project Plan (QAPP) and field planning for surface water and sediment sampling at the MLD Lagoon at the site.

Former Stimson Lumber Millsite; Bonner, Montana. 2013 to 2015. Montana Department of Environmental Quality (DEQ) Petroleum Technical Section. Ms. Erny managed the groundwater monitoring at the site and reviewed the laboratory analytical data to determine if the contaminates for PCBs and petroleum hydrocarbons meets DEQ-7 standards. She conducted field oversight during cleanup activities which include testing soils to confirm that PCB contamination has been remediated to below standards set for industrial properties.

Data Management

City of Chicago Department of Fleet and Facility Management Records Review, 2024—Present: Ms. Erny reviewed city records for a comprehensive environmental evaluation of city-owned vacant lots to determine which properties could be offered for sale. Ms. Erny participated in the desktop environmental review of over 10,000 city-owned lots to create a set of recommendations for the city's risk protection and for information to provide potential buyers regarding each property's condition.

East Palestine Train Derailment, East Palestine, OH. EPA Region 5. 2023 - present. Provided off-site support with laboratory data management. Participated on Environmental Unit calls, weekly ICS support calls and daily site update calls.

Phase I and Phase II Environmental Site Assessments (ESA)

Posey Solar Due Diligence, Posey County, Indiana. Posey Solar. August 2023 through present. Mr. Erny assisted the Project Manager with contacting the IFA to discuss the jurisdiction of abandoned oil wells. Reviewed Phase I ESA results of property and helped with explaining the IDEM's position to the client when encountering contamination from former oil wells.

Former Enviro Shield Preliminary Assessment, Limited Phase II ESA, Williston, ND. EPA Region 8 START V. October 2022 – October 2023. Project manager who implemented the Sampling and Analysis Plan to conduct indoor air and subslab air soil gas sampling within two commercial buildings. The site was a former dry cleaner and the State of ND would like to determine if chlorintated solvents is in the groundwater and indoor air of the on-site buildings is present. Ms. Erny has been working with the EPA to determine if the existing monitoring wells are accessible for groundwater sampling for the next Phase of work. Ms. Erny reviewed existing information about the site and its environs to assess threats, if any, posed to human health or the environment and evaluate whether further investigation under CERCLA/SARA is warranted. A Preliminary Assessment Report was produced by conducting a site assessment according to EPA's Hazard Ranking System (HRS) criteria to assess the relative threat associated with the actual or potential releases of hazardous substances at the site.

Keronite, Inc., Phase I ESA, Greenwood, IN. Curtiss-Wright Corporation. July 2022 to August 2022. Project Manager who conducted the Phase I site reconnaissance at the Keronite industrial facility that conducts advanced surface treatments of lightweight alloys applying plasma electrolytic oxidation to metals. Ms. Erny also wrote the Phase I environmental site assessment (ESA) report for the client that is interested in purchasing Keronite, Inc.

Valbruna Slater Stainless; Fort Wayne, IN. American Electric Power (AEP). October 2021 to May 2022. Project manager who developed a Sampling and Analysis Plan for radiation screening and soil sampling at the

site which was approved by the Indiana Department of Homeland Security. Ms. Erny conducted a on-site radioactivity screening utilizing a Ludlum radiation detector.

Hickory-KenziCreek-Riverside; Benton Harbor, MI. AEP. April 2022 to May 2022. Project manager who developed a proposal for environmental soil sampling to determine soil/waste contaminant concentrations for the purposes of waste determination and disposal. Designed a sampling protocol for the characterization of waste piles for contaminants including volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs); RCRA 8 metals, pesticides and polychlorinated biphenyls (PCBs).

Sediment Sampling Morse Reservoir – Little Chicago Road Bridge; Noblesville, IN. USI Consultants, Inc. and City of Noblesville. January 2022 to May 2022. Project manager and lead field tech who developed a sampling and analysis plan for waste characterization for sediment at the bottom of Morse Reservoir along Little Chicago Road Bridge, assessing VOCs, SVOCs, metals, herbicides, pesticides and PCBs.

Longterm Monitoring (LTM) of Decontaminated Waste Burial Ground (DWBG) and Royal Demolition Explosive (RDX) Manufacturing Area Technical Memoranda Support; Hillsdale, IN. Newport Chemical Depot Reuse Authority. October 2021 to May 2022. Project manager who provided regulatory communications, evaluate field data and commercial laboratory reports from the field sampling events, produce LTM report for submission to the Indiana Department of Environmental Management (IDEM). Ms. Erny compared the field and laboratory analytical results to historical groundwater and surface water sample results using Mann-Kendall and Modified Cost-Effective Sampling (MCES) analyses to identify concentration data trends and to determine if sampling parameters and frequency can be modified or discontinued. Ms. Erny also worked with client to write a EPA Brownfields Grant.

CSO-009 and CSO-015 Limited Phase II ESA; Marion, IN. Lawson-Fisher Associates P.C. November 2021 to March 2022. Project manager who provided a sampling plan and was the geologist, lead field tech and conducted reporting. The site was a historic stove company (foundry) with coal ash still present on-site. The objective of this limited Phase II ESA was to evaluate for the presence and/or absence of chemical impacts to soil and/or groundwater on-site and to further characterize the nature and extent of coal combustion residuals (coke fragments and/or steel processing slag on the site from historic use of a coking oven.

Various Phase I ESAs and Limited Phase II ESAs in Indiana. Kokomo Grain, U.S Bank, Hutton Build, CIM Real Estate Finance Trust, Inc, Chick-fil-a, Raising Cane's and others. 2009 – 2011, 2021 – 2022. Ms. Erny has been the project manager for numerous Phase I ESAs and Phase II ESAs. As the project manager and geologist, Ms. Erny conducted site reconnaissance, reporting, data management and evaluation, risk assessments, and field tasks such as soil, soil gas and groundwater sampling and soil borings.

Leaking Underground Storage Tank (LUST) Projects

Montana Department of Environmental Quality, Petroleum Tank Cleanup Section; **Helena, Montana. 2012 to 2015**. Ms. Erny managed Leaking Underground Storage Tank (LUST) and other release sites including active and former gas stations, former oil bulk plants, and a former wood treatment facility. Successfully obtained closure approval for over 30 petroleum release sites. One project included resolving an older petroleum bulk plant release site using Petroleum Mixing Zone requirements. The majority of release sites were managed using the federal LUST Trust Fund Program and EPA Cleanup Grant Funding. Also wrote, reviewed and provided technical comments for work plans and reports, invoicing, contractor procurement and management, responsible party and stakeholder relations, conducted field monitoring and oversaw remedial activities. Assisted with writing the MDEQ state laboratory quality standards guidance.

LUST Sites in Indiana. Speedway, BP Amoco, ExxonMobile, Shell Oil Products US, and others. 2008 – 2011. Ms. Erny has been the geologist and team field lead for numerous leaking underground storage tank (LUST) monitoring and remediation projects. As the geologist, Ms. Erny conducted reporting, data management and evaluation, risk assessments, and field tasks such as UST removals, soil excavations, assessments of contaminant migration in utility corridors, groundwater monitoring, soil borings, and installation of monitoring and

extraction wells. Ms. Erny then oversaw the SVE system installations and conducted system O&M to optimize system performance.

ADDITIONAL EXPERIENCE AND TRAINING

Computer software:
ArcGIS applications (Survey123, Collector, QuickCapture), EPA SCRIBE database

Field data collection instruments:
Survey123, UltraRAE, MultiRAE, other PID/FID monitors, in-situ groundwater quality monitors, Ludlum radiation detectors, Trimble and Arrow GPS data collectors

Training:
Tetra Tech Project Management Training Level 1
Tetra Tech Region 8 START boot camp 2024
Midwestern States Environmental Consultants Association (MSECA)
2019 National Brownfields Training Conference – Los Angeles, CA
2018 National Tanks Conference – NEIWPCC – Louisville, KY
Risk Assessment 2-day Course – Montana DEQ – Helena, MT
Montana DEQ Technical Writing Course – Montana DEQ – Helena, MT
Contaminant Vapor Migration and Intrusion – Northwest Environmental Training Center – Helena, MT
Light Nonaqueous-Phase Liquids (LNAPLs): Science, Management, and Technology – ITRC – Anaheim, CA

EMPLOYMENT HISTORY

2022 - Present	Mid-level Geologist and Project Manager, Tetra Tech, Indianapolis, IN
2021 – 2022	Project Manager, Terracon, Indianapolis, IN
2017 – 2021	Project Manager, Indiana Brownfields Program, Indianapolis, IN
2016 - 2017	Project Manager, Quality Environmental Professionals, Inc., Indianapolis, IN
2012 - 2015	Environmental Specialist, Petroleum Tank Cleanup Section, Montana DEQ, Helena, MT
2008 - 2011	Environmental Field Geologist, ATC Associates, Inc., Indianapolis, IN
